Job Description

Req ID: R-0000151214

What is the opportunity?

We are seeking a highly motivated and detail-oriented individual to join our team as a GRM Analyst, PCL Forecasting Intern. This role will assist in the design and implementation of enhancements to the IFRS 9 expected credit loss forecasts produced by the Credit Provisioning, Analysis, and Measurement team.

What will you do?

- Assist in designing and implementing enhancements to IFRS 9 Expected Credit Loss forecasts to incorporate macroeconomic forecasts
- Simplify and streamline models for faster reporting, including automation initiatives
- Partner with Platform Risk and Financial Control teams to understand requirements and develop solutions
- Develop an understanding of stakeholder requirements and propose, define, and implement solutions
- Develop preventative controls to ensure accuracy of inputs, transformations, and outputs of models
- Leverage mathematical, modeling, coding, and IT knowledge (SAS/Python) to analyze requirements related to credit risk measurement systems
- Perform testing and quality control procedures to ensure completeness and accuracy of data transformations and outputs
- Prepare and maintain documentations relating to model methodology, processes, testing procedures, and controls

Job Requirements

Must-have:

- Currently enrolled at a Canadian post-secondary institution with a focus on data science, computer science, mathematics,

statistics, machine learning
•Leadership acumen and a passion to apply it in a dynamic business environment Excellent interpersonal and highly developed communication skills (verbal and written)
•Creative and analytical thinker who is self-driven and capable of working in a fast paced environment
•Experience or understanding of open-source software frameworks (Hadoop), data visualization tools (Tableau and Splunk), and databases (SQL and/or VBA)
•Programming skills in one or more languages (ex. Python, R)
•Ability to data extract, transform, and load processes with a variety of data types
•Ability to perform complex data analysis on large volumes of data and present findings to stakeholders
•Strong MS Office skills - Word, Outlook, Excel and PowerPoint

Nice-to-have:
• Knowledge of design, development, and implementation utilizing current analytics technologies and architecture, as well as data warehouse concepts and methodologies
•Relational database concepts and design experience
•Ability to learn and absorb new concepts (in business and in systems) quickly and apply new knowledge

Citizenship Requirement N/A
