<b>Job Description</b>	

ApplyBoard simplifies the study abroad search, application, and acceptance process by connecting international students, recruitment partners, and educational institutions on one intuitive and personalized platform.

ApplyBoard is a mission-driven, hyper-growth organization. It has been attracting dedicated individuals for more than eight years who are inspired every day to break down barriers to international education and take their careers to new heights at a company that will invest in their career growth

Our [six core values](#) are our compass in our mission to Educate the World and the foundation of our unique company culture. As an organization built on a foundation of diversity, it's important that our team members are representative of the students from more than 150 countries that we support.

#### Key Responsibilities:

- As a Software Developer at ApplyBoard what you do will impact the lives of many students
- You will be developing services used by students all around the world
- You will be tasked with delivering well-tested, clean code while working both independently and with a team
- You will be involved in creating everything from machine learning models to backend systems that are used by thousands of people each day

#### Job Requirements

**Preferred Qualifications:**

- Experience with Data Structures, Algorithms and Object-Oriented Programming, Git
- Web development experience in any of the following: Python, Ruby, Javascript
- Using and/or creating RESTful APIs
- Interest and ability to learn other tools and technologies as needed

**Bonus points for:**

- Evidence of a project that you have worked on that can showcase your skillset

**Citizenship Requirement** N/A

## **APPLICATION INFORMATION**

**Application Procedure** Through Employer Website

**Special Application Instructions**

Please click the "I intend to apply to this position" button on SCOPE and also submit your application via the employer's website.
