Job Summary:

We are seeking a skilled Application Development Engineer specializing in iOS and React Native to develop innovative mobile apps and server-side applications, enhancing connectivity with our Linux-based smart products

Responsibilities:

- Develop, maintain, and optimize mobile applications using iOS (Swift) and React Native.
- Build embedded server-side applications to interface seamlessly with enterprise-level solutions.
- Review, refactor, and maintain high-quality, efficient code.
- Investigate new technologies and evaluate alternative solutions.
- Provide accurate development effort estimates.
- Adhere to established development, testing, bug-fixing, and release protocols.
- Follow coding standards and best practices defined by our engineering team.
- Track, manage, and report software bugs effectively.
- Complete other responsibilities as assigned by management.

Join our dynamic team and contribute to the growth and success of our cutting-edge smart solutions!

Job Requirements

Qualifications and Skills:

- Minimum 1 year of experience in iOS app development using Swift.
- Minimum 1 year of experience in React Native application development.
- Minimum 1 year of experience in Linux-based application development.
- Proficiency in HTML, CSS, Bootstrap, Java, and JavaScript (1+ years).
- Experience in Node.js (1+ years).
- Familiarity or experience with LAMP stack (Linux, Apache, MySQL, PHP).
- Proficient in version control using Git.

Citizenship Requirement N/A
