Job Description

Job Title: 2026 Summer Intern - Clinical Operations Excellence

Job ID: 202512-132393

Application Deadline: **January 24th, 2026**

At Roche you can show up as yourself, embraced for the unique qualities you bring. Our culture encourages personal expression, open dialogue, and genuine connections, where you are valued, accepted and respected for who you are, allowing you to thrive both personally and professionally. This is how we aim to prevent, stop and cure diseases and ensure everyone has access to healthcare today and for generations to come. Join Roche, where every voice matters.

The Position

At Roche, our Pharma Ambition is to transform drug development and deliver 20 transformative medicines by 2029. As a Summer Intern within Global Clinical Operations (PDG), you will support the Clinical Operations Excellence (COE) team in enhancing the way we deliver clinical trials to patients. This role is designed for a student looking to gain a foundational understanding of the clinical trial industry and the infrastructure required to develop life-saving medicines.

- Aid in the implementation and management of clinical operations business processes to ensure they meet global standards.
- Develop a basic understanding of Good Clinical Practice (GCP) and help support a strong compliance culture within the department.
- Support the adoption of new technologies and AI-driven tools aimed at making clinical trial delivery more efficient.
- Assist in organizing and sharing critical information to ensure study teams have real-time access to the data they need for decision-making.
- Participate in change management activities and bring a fresh perspective to solving operational problems.
- Build a baseline awareness of how clinical trials are operationalized in a global pharmaceutical setting.

- Learn to prioritize tasks independently while collaborating across a diverse, global team.
- Develop professional judgment by analyzing information to solve potentially complex problems.

Additional Information:

- **Location:** Based in Mississauga, Hybrid (minimum of 3 days per week in the office).
- **Hours:** Full-time (35 hours per week) Internship
- **Length:** This position is a 4-month internship, and is expected to begin in May 2026.

This position is not eligible for relocation support.

#RocheInternshipCA2026

The expected salary range for this position based on the primary location of Mississauga is 57 416,00 and 75 358,50 of hiring range. Actual pay will be determined based on experience, qualifications, and other job-related factors as determined by the company.

We use artificial intelligence to screen, assess or select applicants for this role.

This posting is for an existing vacancy at Hoffmann-La Roche Ltd.

Who we are

A healthier future drives us to innovate. Together, more than 100'000 employees across the globe are dedicated to advance science, ensuring everyone has access to healthcare today and for generations to come. Our efforts result in more than 26 million people treated with our medicines and over 30 billion tests conducted using our Diagnostics products. We empower each other to explore new possibilities, foster creativity, and keep our ambitions high, so we can deliver life-changing healthcare solutions that make a global impact.

Let's build a healthier future, together.

Roche is an Equal Opportunity Employer.

Job Requirements

Who you are:

- Currently enrolled in an undergraduate in Data or IT preferred, (Science, Business, Healthcare, or closely related fields).
- This is an entry-level student position; previous experience in a professional office or research environment is a plus but not required.
- Strong communication, a willingness to learn, and an interest in using data and technology to improve patient outcomes.

Preferred:

- Coding proficiency and AI familiarity.

Citizenship Requirement N/A
