Job Description

Req ID: R-0000148695

Job Summary

Corporate Treasury is responsible for management of enterprise-wide capital, liquidity, non-trading interest rate risk and pension assets, and execution of term funding, capital, and interest rate risk hedging transactions. In this role, candidate will have the opportunity to work in both the Capital & Liquidity spaces of Corporate Treasury.

Capital Measurement under Financial Resource Optimization (FRO) is responsible for management of capital resources in support of RBC's key strategic objectives. FRO's mandate includes measurement, monitoring and forecasting of risk-weighted assets, leverage, and capital metrics. FRO works jointly with Businesses, Strategy, and Group Risk Management and other groups in Finance to measure and deploy capital in support of RBC's growth and financial objectives, and adherence to regulatory requirements.

Liquidity Measurement is primary responsible for managing RBC's liquidity risk in a prudent and cost-effective manner, against both regulatory and internal targets, and in adherence to policies and principles outlined in an Enterprise Risk Management Framework. Corporate Treasury develops strategies and contingency plans in support of the Bank's liquidity risk objectives. As a Data & Product Analyst student, you will work in the both Capital & Liquidity Data, Systems and Business Solutions teams supporting the Product Owners with both the existing infrastructure platform and the build-out/upgrades to the platform due to key Regulatory Initiative and/or major initiatives implemented due to the bank's key business strategies and objectives.

What will you do?

You will support the Product team by contributing and leading:

1. 1) Analytics & Metrics. You will help our team make data-driven decisions.
2. Work alongside a product owner(s) and be responsible for analyzing key data sets and data elements related to Capital & Liquidity Measurement and Reporting.
3. Participate on a team where data, measurement, and analysis are integral to smart decision making and ensuring accurate and complete measurement of Capital & Liquidity metrics such as RWA (Risk Weighted Asset) & LCR (Liquidity Coverage Ratio).
4. Prototype, test, and operationalize dashboards, KPIs and visualizations.
5. Development of agile metrics (Sprint velocity, burndown, etc.) to contribute to oversight of BAU (business as usual) team oversight and increase agile maturity.

1. 2) Root Cause Problem Solving. You will help improve key business processes.
2. Following the data and metrics extracted, investigate a business process, engage others in the organization, analyze systems, document as appropriate, and figure out why something is not working/stalling.
3. Communicate findings concisely and succinctly.
4. Work with Capital & Liquidity team members to devise, weigh and implement solutions.
5. Engage Business teams, Critical Data providers, & other Finance and Risk functions to find solutions and/or remediate issues with data for measurement & reporting of both Capital & Liquidity domains.

1. 3) Special Projects.

We have a broad mandate within the team and are always looking for ways to apply creativity and special skills as it helps us to improve our product and user experience. This can be applied in all domains of interest utilized in this versatile team (data & business oriented solutions and practices, technical capabilities such as AI/ML, insights & analytical projects such as data visualization & presentation and much more).

Job Requirements

Must-have

- Currently enrolled at a Canadian post-secondary institution with a focus on Business, Finance & Economics, Data Science & Data Analytics, Computer Science & Engineering, Mathematics & Statistics.
- Comfortable with learning new technologies, applying empirical thinking to data and balanced with ability/ambition to perform logical deduction based on learnings of business & financial concepts on the job (prior knowledge/background nice-to-have).
- Excellent interpersonal and highly developed communication skills (verbal and written).
- Creative and analytical thinker who is self-driven and capable of working in a fast-paced environment.
- Leadership acumen and a passion to apply it in a dynamic business environment.
- Capability to manage multiple priorities across several assignments and prioritize effectively.

Nice-to-have

- Knowledge of and experience in Capital, Liquidity, and Credit & Liquidity Risk Management.
- Knowledge/Ability to Learn of Regulatory Guidelines around Capital & Liquidity such as CAR & LAR Guidelines.
- Knowledge or experience with business analysis process (requirements gathering, documentation, use cases).
- Expressed interest or previous experience in the financial industry or FinTech.
- Experience with agile or design thinking methodologies or frameworks.
- Demonstrated blend of technical and business skills.

Citizenship Requirement
