Currently enrolled as a junior or senior in a Bachelor's degree program in Artificial Intelligence, Telecommunications, Computer Science, Computer Engineering, Information Systems, or a related field at an accredited Canadian institution.

## More information

Some of our benefits for students in Canada:

- Flexible and hybrid working schemes to balance work and life
- Professional development events and networking opportunities
- Campus perks designed to make your student experience enjoyable and social, such as access to an onsite cafeteria, free employee parking, complimentary fitness centre, and sports facilities (volleyball, basketball, pickleball courts, ping pong, and employee leagues)
- Well-being programs, including Personal Support Service 24/7 - a confidential support channel open to all Nokia employees and their families in challenging situations
- Opportunities to join Nokia Employee Resource Groups (NERGs) and connect with people who share your passions and values

- Employee Growth Solutions, mentorship programs, and coaching support for your career development
- A learning environment that fosters both personal growth and professional development - for your role and beyond

#### **Disclaimer for US/Canada**

Nokia maintains broad annual base salary ranges for its roles in order to account for variations in knowledge, skills, experience and market conditions, and with consideration to internal peer equity. Check the salary ranges in the job info section for this role.

**All North America job posts will post for a minimum of 3 calendar days and up to 180 days or until candidate/s identified.**

## **Your responsibilities**

- Gain basic knowledge of the Nokia Products, with a particular focus on the deployment, delivery, and operational aspects of Custom Application and Solution products.
- Actively participate in experimental initiatives within the Nokia Lab, working on innovative automation and AI-driven operational workflows, including end-to-end closed-loop automation use cases.
- Conduct comprehensive analyses of experimental outcomes, benchmarking them against existing customer processes to identify gaps, inefficiencies, and opportunities for enhancement.
- Prepare detailed reports on findings, providing actionable insights and recommendations to optimize and improve the current automation solutions and operational workflows.

#### **Job Requirements**

## **Your skills and experience**

- Familiarity with software programming for AI agentic frameworks, data analytics, and strong grasp of algorithms and data structures to solve real-world challenges efficiently.
- Proactive, inquisitive mindset with a can-do attitude toward learning new technologies, tools, and concepts in dynamic environments.
- Strong programming skills in Python; experience with C++, Go, or Java is a plus, along with exposure to big data ecosystems (Hadoop, Spark) or data processing pipelines.
- Interest or background in Artificial Intelligence (AI) or Machine Learning (ML) through projects, research, or personal initiatives.
- Familiarity with distributed systems, containerization, and orchestration tools (e.g., Docker, Kubernetes), plus ability to analyze problems, design experiments, and debug complex system interactions.
- Excellent communication skills and proven effectiveness in collaborative team settings.

**Citizenship Requirement** N/A

## **APPLICATION INFORMATION**

**Application Procedure** Through Employer Website
