About Us

Sophos is a global leader and innovator of advanced security solutions for defeating cyberattacks. The company acquired Secureworks in February 2025, bringing together two pioneers that have redefined the cybersecurity industry with their innovative, native AI-optimized services, technologies and products. Sophos is now the largest pure-play Managed Detection and Response (MDR) provider, supporting more than 28,000 organizations. In addition to MDR and other services, Sophos' complete portfolio includes industry-leading endpoint, network, email, and cloud security that interoperate and adapt to defend through the Sophos Central platform. Secureworks provides the innovative, market-leading Taegis XDR/MDR, identity threat detection and response (ITDR), next-gen SIEM capabilities, managed risk, and a comprehensive set of advisory services. Sophos sells all these solutions through reseller partners, Managed Service Providers (MSPs) and Managed Security Service Providers (MSSPs) worldwide, defending more than 600,000 organizations worldwide from phishing, ransomware, data theft, other every day and state-sponsored cybercrimes. The solutions are powered by historical and real-time threat intelligence from Sophos X-Ops and the newly added Counter Threat Unit (CTU). Sophos is headquartered in Oxford, U.K. More information is available at www.sophos.com.

Role Summary

As an intern on the engineering team, you will be working closely with developers, QA engineers, and the Development Manager to help build and deliver innovative features that protect millions of users every day from cyber threats.

Depending on your experience, interests, and how your skills develop during the term, you may have the opportunity to explore more advanced development tasks. You'll be part of a supportive engineering team that uses modern tools, technologies, and industry best practices. The team values continuous learning and improvement, and you'll be encouraged to contribute to that culture as you grow in the role.

The position requires full-time availability (40 hours per week) and may follow a remote, hybrid, or onsite work structure, depending on the candidate's location and team requirements.

The internship/co-op term will be either 4, 8 or 12 months, depending on the selected candidate's availability and interest.

What You Will Do

- Assist in writing code and test cases under the guidance of your mentor
- Participate in software design discussions and assist in implementing features with a focus on quality and functionality
- Provide clear updates on progress for assigned tasks
- Build and maintain an effective relationship with team members
- Work with your mentor to understand how time estimates are made and contribute to task planning for your own assignments

Job Requirements

What You Will Bring

- Experience of developing software using any professional programming language
- Ability to learn new skills quickly and apply them to the role
- Natural problem solver who enjoys being challenged
- Ability to organize your own time to deliver against tasks set by others
- Ability to build stable and useful working relationships within a project team

Desirable Experience and Skills

- Experience writing software using C, C++, Swift or similar
- Experience with scripting in Python

Citizenship Requirement N/A
