Job Description

Position Title: Software Automation Test Engineer (Co-op Student/Intern)

Employment Type: Student - Co-op/Intern

Location: Ottawa ON, Onsite

Welcome to Lumentum! We're all about harnessing cutting-edge tech to create a brighter, more connected future. We are the leaders in optical and photonic products, working at the intersection of innovation and impact. Here's what we're up to:

Cloud & Networking

- Powering high-speed data transmission for cloud data centers, AI/ML, enterprise systems, and communication services. Think streaming, gaming, and next-gen tech-we make it happen.

Industrial Tech

- Innovating with state-of-the-art lasers used in industries like EVs, solar power, display technology, and semiconductors. We're enabling the future of green tech and advanced manufacturing.

At Lumentum, we're committed to collaboration, inclusivity, and empowering our team to shine. Together, we're shaping the tech of tomorrow while supporting a culture where everyone thrives.

Why You'll Love This Role

Lumentum is seeking an enthusiastic and innovative **Software Automation Test Engineer (Co-op/Intern)** to join the R&D Design Verification Testing (DVT) team in the Applied Photonics Solutions department based in **Ottawa, Ontario**.

The Opportunity...

8-month term (preferred): Sept 2025 to April 2026

12-month term: Sept 2025 to Aug 2026

What You'll Be Doing

Do you enjoy the trial of problem solving, communicate well with others and act as a team player?

If so, consider joining our team of talented software designers and optical engineers.

You will have a positive impact on our success by:

- Contributing to the ongoing development of automated solutions for our next generation optical switches, amplifiers and circuit packs.
- Collecting and analyzing manufacturing data to improve product performance and quality.
- Solving complex technical problems.
- Working in close collaboration with the Optical, Hardware, Software, and Firmware R&D teams.
- Analyzing and characterizing device failures; and,
- Improving the quality and robustness of our products.

Job Requirements

What We're Looking For

- A craving to succeed and to do things right the first time.
- Strong object-oriented software design and implementation (any language).
- Strong problem-solving skills.
- Excellent verbal and written communication skills

Education

- 2+ years towards a degree in Computer/Electrical Engineering, Engineering Physics, Computer Science or equivalent.

The following qualifications are an asset:

- Experience with Visual Studio 2013+ (VB.NET or C#), XML, Python, Perl and/or TCL shell scripts.
- Experience in instrumentation and automation.
- Understanding of optical systems; and,
- Experience with optical instruments and optical fibers.

Citizenship Requirement N/A

APPLICATION INFORMATION

Application Procedure Through Employer Website

Special Application Instructions

Please click the "I intend to apply to this position" button on SCOPE and also submit your application via the employer's website.
