Job Description

Job Requisition ID

25WD92634

Autodesk is looking to add 2 creative technologist interns who are interested in visual and deep learning to join our team in Montreal.

The ideal candidate will bring passion for AI, Innovative technologies, film & games industries, and knowledge in the fields of computer vision and computer graphics with a focus on machine learning. If your interests lie in the cross-section between artificial intelligence and the film and television and games industries, then this is the job for you!

What you'll do:

- Prototype and incubate AI-forward techniques and research that aid in the production of 3D graphics, video, games and visual effects by applying state-of-the-art computer vision and graphics algorithms.
- Leverage the latest tools and AI techniques in order to either increase (artist) quality, or drive efficiency in the production process.
- Participate in developing predictive models for various analysis solutions by using machine learning and analytical techniques
- Extend existing ML libraries and frameworks
- Stay up to date with the state-of-the-art advances in both AI research and production areas related to the company's projects.

The 2026 Canada Internship program runs for 16 weeks (May 4th - August 21st). All internships are paid. As an intern, you will contribute to meaningful projects, be mentored by industry leaders, and participate in tech talks and other activities designed to support your personal and professional development. Our internships align with Autodesk's Flexible Workplace approach, which is designed to meet the needs of our business while providing flexibility in support of office, remote and hybrid work preferences.
