Job Description	

About Pinterest:

Millions of people around the world come to our platform to find creative ideas, dream about new possibilities and plan for memories that will last a lifetime. At Pinterest, we're on a mission to bring everyone the inspiration to create a life they love, and that starts with the people behind the product.

Discover a career where you ignite innovation for millions, transform passion into growth opportunities, celebrate each other's unique experiences and embrace the flexibility to do your best work. Creating a career you love? It's Possible.

We're looking for inquisitive and innovative interns to join Pinterest's IT team and help develop, configure, implement and support Pinterest's Enterprise Applications. You'll partner with stakeholders and cross-functional teams to learn how large-scale internal systems are architected, automated, and integrated-shipping real configurations, services, and integrations that streamline how Pinemployees work. Expect meaningful projects, supportive teammates, and plenty of opportunities to explore ideas that make a measurable impact on Pinterest and our Pinners.

What you'll do:

- Engage in a specific project within the Pinterest IT team, involving technical solutions for real-world use cases within the Enterprise Systems realm.
- Gain experience in configuration management, architecture, integration, and systems analysis.
- Develop automation scripts to improve processes and reduce manual tasks.
- Provide technical support, including troubleshooting and resolving issues, for SaaS platforms pertaining to various business areas.
- Collaborate across major SaaS platforms such as Jira, Confluence, Slack and other widely used software stacks.
- Create and maintain technical documentation of system processes and configurations.
- Openly communicate new ideas and opinions as you grow professionally and personally, seizing learning and development opportunities.

•We offer 2 internship start dates:

- May 18, 2026 - August 7, 2026
- June 15, 2026 - September 4, 2026

Job Requirements

What we're looking for:

- Prior experience or exposure to SaaS tools, engineering tools, and process mapping.
- Passion for automation to reduce manual efforts where possible.
- Ability to present your work in front of technical and non-technical audiences.
- This position requires current enrollment in a school or education program in which the individual is working towards a Bachelor's in Computer Science, IS/MIS, or other engineering areas or a related technical field
- Obtain Bachelor's in Computer Science, IS/MIS, or other engineering areas or a related technical field by June 2027

•US based applicants only

Citizenship Requirement N/A
