#### Job Description

**Job Title: Software Development Intern**

**Job ID:** 250003595

#### Summary:

VIAVI (NASDAQ: VIAV) is a global provider of network test, monitoring and assurance solutions for telecommunications, cloud, enterprises, first responders, military, aerospace, and railway. VIAVI is also a leader in light management technologies for 3D sensing, anti-counterfeiting, consumer electronics, industrial, automotive, government and aerospace applications. We are the people behind the products that help keep the world connected at home, school, work, at play, and everywhere in between. VIAVI employees are passionate about supporting customer success and we welcome people who bring their best every day to the company - to question, to collaborate and to push for solutions that will delight our customers.

#### Duties & Responsibilities:

##### Job Summary

As part of our Data Science team, you will work on developing new features for our existing products as well as creating entirely new ones to help customers better understand their networks and improve their user experience. You'll be working closely with software engineers, product managers, and other data scientists in a dynamic environment where we encourage innovation and creativity. Our goal is to make network management easier, more efficient, and more accessible for all users, regardless of technical background or expertise. Join us if you want to be part of this exciting journey!

##### Responsibilities

- Developing machine learning models to solve real-world problems
- Exploring and visualizing data to gain insights and make recommendations
- Collaborating with cross-functional teams to implement solutions
- Continuously improving processes and workflows
- Staying up-to-date with the latest advancements in AI/ML

If you have what it takes to push boundaries and seize opportunities, apply to join our team today.

VIAVI Solutions is an equal opportunity and affirmative action employer - minorities/females/veterans/persons with disabilities.

## Job Requirements

### Pre-Requisites / Skills / Experience Requirements:

#### Qualifications

- Pursuing a Bachelor's degree in Computer Science, Engineering, Mathematics, Statistics, or related field
- Knowledgeable in at least one programming language (e.g., Python)
- Familiarity with common libraries and frameworks for data science (e.g., NumPy, pandas, scikit-learn)
- Experience with deep learning frameworks (e.g., TensorFlow, PyTorch)
- Strong understanding of statistics and probability theory
- Ability to communicate complex ideas effectively both verbally and written
- Detail-oriented mindset with strong problem-solving skills
- Self-motivated learner who can adapt quickly to changing requirements

**Citizenship Requirement** N/A

## APPLICATION INFORMATION

**Application Procedure** Through Employer Website

**Cover Letter Required?** Optional
