Job Description

Start: September (or earlier)

End: December 19

About the Role:

At Maximizer, we believe that the success of our company depends on the talent, passion, and dedication of our people. We are looking for self-motivated individuals who thrive in a performance-driven environment built on creativity, integrity, professional development, and open communication.

We are seeking a Software Engineering Intern to join our Engineering team. This role is ideal for a frontend or full-stack developer with a focus on frontend technologies. Reporting to the Engineering Manager, you will primarily contribute to the development of our Outlook Addon (Maximizer AI CRM for Outlook) and other integrations. You will work with a modern technical stack that includes TypeScript and Angular, leveraging APIs as the backend for all new integrations.

What you'll do:

- Collaborate with the Integration team to build robust software solutions.
- Contribute to the development of the Outlook Addon (Maximizer AI CRM for Outlook).
- Work on creating and enhancing integrations using a modern frontend development stack.

Who you are:

- Curious and proactive:** You have a natural desire to explore new concepts and ideas.
- Fast learner:** You quickly pick up new skills and adapt to new challenges.
- Flexible and open-minded:** You value feedback and are eager to grow from constructive critique.
- Eager to learn from the past:** You're excited to work with cutting-edge technologies but also understand how legacy applications

were built.

•**Portfolio-ready:** You have at least one project (personal, study, or commercial) showcasing your skills in TypeScript and one of the following frameworks: Angular, React, VueJS, or Svelte.

Why you should apply:

- Competitive Salaries with RRSP matching program
- Generous paid vacay and sick days
- A powerful Laptop
- Peer to peer recognition and rewards
- Team building events, happy hours, and off-sites
- Parental leave benefits

About Maximizer

Maximizer was launched in a garage on Vancouver Island in 1987, evolving through the development of early contact management systems (CMS), through sales force automation (SFA) technologies, right to today's sophisticated customer relationship management (CRM) systems. Along the way, we have pioneered many of today's technologies. Over this 30-year history we have attracted over 100,000 customers from around the world, and 1 million users.

Today, we are one of the few CRM providers in the world who can deploy our software in all three environments of on-premises, private or shared cloud, while providing access via a desktop/laptop, via a mobile device, or using the Maximizer app.

Ultimately, however, we are successful because for over three decades we have proven we know how to help customers do three things: secure new customers; retain them for the long term; and maximize the repeat business from them.

Equal Employment Opportunity:

If you're interested in a career with Maximizer CRM and are committed to striving for excellence, please submit your resume, transcript, and portfolio. We are an equal opportunity employer. We do not discriminate based on race, faith, colour, cultural background, gender, sexual orientation, age, marital status, or disability status. We thank all applicants for their interest, however, only those selected for an interview will be contacted.

Citizenship Requirement Canadian & Permanent Residents & Refugees Only
