#### Job Description

JR10023664

**Application Deadline: July 1, 2025**

**Data Analyst / Application Developer / Co-op Internship / Hybrid: 3 to 4 days a week in office / Toronto / 37,5 hours weekly / Starting in September 2025**

**Role Overview:** We are seeking a motivated and detail-oriented Co-op Intern to join our trading team as a Data Analyst/Application Developer. This role will focus on building processes and software to collect financial data and analytics to support our trading strategies and decision-making processes. The successful candidate will gain hands-on experience in a dynamic trading environment and contribute to the development of data-driven insights.

#### Key Responsibilities:

- Develop and manage new and existing internal software tools to store, collect, process, display and output financial data.
- Work with, adapt to and comprehend many different forms of data input and collection.
- Assist in collecting, cleaning, and analyzing large datasets related to trading activities.
- Develop and maintain data models and dashboards to monitor trading performance.
- Collaborate with traders to build, test and implement software that enhances their trading abilities with data-driven tools.
- Prepare reports and presentations to communicate findings to the trading team.

#### What We Offer:

- Hands-on experience in a fast-paced trading environment.
- Mentorship from experienced professionals in the field.

- Opportunities to develop technical and analytical skills.
- A collaborative and supportive work culture.
- Potential for future full-time opportunities.

This offer appeals to you and you would like to be part of a dynamic team? Don't wait any longer and apply now!

## Job Requirements

### Qualifications:

- Currently enrolled in a relevant undergraduate program (e.g., Finance, Data Science, Computer Science, Engineering).
- **Must complete a university-accredited internship in Fall 2025.**
- Strong analytical and problem-solving skills.
- Expertise in data analysis tools and programming languages (e.g., Python, pandas, SQL)
- Proficiency with data visualization tools (e.g., Power BI, Tableau, Snowflake, MS SQL Server).
- Excellent communication and teamwork skills.
- Ability to work independently and manage multiple tasks.
- Experience building software applications from scratch with proper software architecture.
- Experience in Bloomberg, VBA (an asset).

**Citizenship Requirement** N/A
