Job Title: Engineering Research Scientist Co-op (Onsite) - May 2026

Job ID: Req #506

Term: May 2026

Duration: 4, 8 months

Openings: 1 position

Salary Range: \$3,650- \$4,525 CAD per month

Application Deadline: **January 26, 2026**

Your opportunity

By joining the Kardium team, you can help make a difference in the lives of millions around the world. We have developed a ground-breaking medical device for the diagnosis and treatment of the most common heart rhythm disorder, atrial fibrillation - which can cause stroke, heart failure, and other heart-related complications.

Kardium's mission is to deliver the best treatment for atrial fibrillation. To achieve this, we have developed The Globe® Pulsed Field System - we have a fantastic technical team that has developed a product with strong, unique, and customer-valued differentiators versus other solutions on the market. We have built connections with key opinion leaders who are already using the Globe System and are helping to tell our story.

We have obtained FDA approval and officially begun the commercial launch of the Globe® Pulsed Field System. This is a pivotal and exciting time in our journey, as we bring this life-changing technology to patients!

We are seeking a curious, self-driven, and technically strong Engineering Research Scientist to support the exploration of new design principles, manufacturing process improvements, and materials for future iterations of the Globe System. This role is ideal for someone who thrives in a hands-on, research-focused environment and is passionate about solving complex engineering challenges.

Please note, this opportunity is an onsite work arrangement, located in Burnaby, BC.

Meaningful work you will be a part of

You will engage in activities that develop practical and transferable skills such as:

- Assisting the Special Engineering Projects team with exploring new solutions for the development of next-generation Globe devices.
- Researching alternative and improved manufacturing methods, including joining techniques, surface treatment, coating, plating, and sealing.
- Designing and conducting experiments using a methodical and systematic approach, applying the scientific method and Design of Experiment (DoE) principles.
- Documenting and analyzing test results to inform product and manufacturing process design decisions.
- Communicating effectively with your teammates to evaluate feasibility and implementation of new processes.
- Occasionally assisting with the assembly and testing of new design prototypes.

Why work at Kardia?

A meaningful Co-op/Intern term experience, working with truly innovative technology and an ambitious team, combined with:

Making a Difference: Knowing every day that you are making a difference in people's lives by helping treat a condition that debilitates millions worldwide.

Meaningful Work: Gain hands on experience working on projects that make an impact, giving you valuable experience to kickstart your career.

Team Bonding Events: Connect with peers (of 40+ Co-ops) and participate in fun team activities, social events, and monthly Co-op events.

Development & Growth: Collaborating with engaged leaders and multi-disciplinary teams who are committed to your success by mentoring and supporting your development and growth.

Innovative Projects: Be part of cutting-edge projects where you can share your ideas and learn new skills in a fast-paced environment.

Life at Kardia

What makes us a great place to work?

1. Our Purpose
2. Our People
3. Our Culture

At Kardia, we embrace diversity of background, experience, and perspective and we're committed to inclusion and equity at every level. We encourage applications from all qualified candidates who represent the full diversity of all communities.

We collaborate with Employee Resource Groups (ERGs), as volunteer-led groups who share a common dimension of diversity and come together to provide support, education, and other opportunities across Kardia. Examples of our ERGs include Women ERG, Pride ERG, Race Ethnicity & Cultural Heritage (REACH) ERG, Truth & Reconciliation ERG, Persian Community ERG, Chinese ERG, Barangay Kardia (Filipino) ERG, Brazilian ERG and Irish ERG.

As part of your application, we encourage you to note if you require an accommodation for the recruitment process (including alternate formats of materials, accessible meeting rooms or other accommodations). There will be an optional section in the application form where you can provide this information to the recruitment team.

And our employees think we are great too - check out Glassdoor to learn more!

Job Requirements

What you bring to the team

Our Kardia team is smart, creative, and passionate about creating cutting-edge medical devices to help improve people's lives.

We work within a collaborative environment based on trust and respect. And we understand that only by working together can we solve the unsolvable.

You will be successful in this role because you possess these attributes:

- Strong understanding of the scientific method, and good instincts for experimental design
- Ability to efficiently identify key sensitivities in physical and chemical systems, and to support hypotheses with evidence from

testing.

- Ability to perform literature reviews, and to pick out relevant information from peer-reviewed literature.
- Hands-on experience with prototyping, testing, and mechanical assembly.
- Excellent communication skills and the ability to collaborate with cross-functional teams and external partners.
- A proactive, curious mindset with a passion for innovation and continuous learning.

Citizenship Requirement N/A
