| Duration | 8 months |
| Work Mode | Hybrid |
| Salary Currency | CAD |
| Salary | 0.0 per hour for 40 Major List |
| Salary Range \$ | 4200 per month |
| Job Description | |

- Full-Stack Development:** Dive deep into our web application, utilizing C#, TypeScript, and React to build and enhance features across the entire stack.
- Feature Innovation:** Take ownership of new functionalities from concept to deployment. You'll translate UI/UX designs and wireframes into polished, responsive code that delights users.
- Collaborative Problem-Solving:** Work in an agile environment alongside product managers, designers, and senior engineers to tackle complex challenges and deliver impactful technical solutions.
- Architectural Impact:** Engage in meaningful code reviews and architectural discussions that shape our backend processes and elevate the quality of our codebase.
- Continuous Growth:** With a dedicated learning budget and a culture of mentorship, you'll be encouraged to explore new technologies and expand your skill set.

Job Requirements

- Currently pursuing or recently completed a Bachelor's degree in Computer Science, Software Engineering, or a related field
- Demonstrated experience in building web applications through projects, coursework, or

previous internships

- Proficiency with modern programming languages and frameworks such as Node.js, .NET, or React
- A solid understanding of database fundamentals, with some hands-on experience with technologies like SQL Server, Oracle, or PostgreSQL
- Familiarity with cloud platforms (e.g., AWS or Azure) is a significant asset
- A natural curiosity and strong analytical skills, with a passion for learning and creative problem-solving
- Excellent communication skills and a collaborative spirit, ready to thrive in a team-oriented setting

Citizenship Requirement N/A
