Job Title: September 2025 Technical Systems Co-op

Application Deadline: **June 14, 2025**

Elk Valley Resources (EVR) operates four steelmaking coal mines that employ over 5,000 people in the Elk Valley of British Columbia. We are committed to responsible resource development, environmental performance and building strong partnerships with communities and Indigenous Peoples.

EVR is proud to be part of the Glencore Group, joining a portfolio of operations around the world and a history that dates back more than 100 years in Canada.

Start Date: September 2025

Duration: 8 months

What we offer:

At EVR, we're dedicated to supporting our workforce on their unique career journeys.

EVR recognizes our employees' skills, competencies, and performance and offers opportunities with competitive compensation and benefits. We also aim to promote employee health and wellness and provide opportunities for professional development. We believe in the power of diversity and strive each day to create a workplace where each individual is valued and respected for their contributions.

We also believe that our employees are the reason we are accomplishing great things and are committed to supporting them through our many different programs.

Join us in the breathtaking Elk Valley of British Columbia. Here you will find outdoor adventure at your fingertips. Whether it's biking and skiing, or the laid-back atmosphere of fishing and hiking, there is something for everyone! Come experience what work life balance is all about!

Responsibilities

- Participate in and adhere to health and safety programs and policies
- Support in planning and implementation of updates to existing systems (purchased, configured and/or developed internally) as well as new solutions in mining engineering (including but not limited to haulage and Mining and Geology Systems)
- Support engagement and sustainment activities for geology, haulage, and Mining and Geology systems (including incidents, problems, defects, and improvement management)
- Coordinate efforts to deliver resources with other teams and groups within the Digital Operations, Technology and Innovation department
- Test, analyze and provide quality assurance for software solutions in place for mining engineering
- Support in the software design, development, unit, and integration testing
- Support in building systems specifications documents as well as external systems design documentation
- Provide timely Application support and Vendor Engagement to ensure resolution of support related issues when required
- Provide estimates for software development and testing, leading small to medium sized software implementations
- Opportunities to be involved in software development using DEVOPS, Azure Cloud enabled solutions and Data Science

Benefits

- Receive financial assistance for travel expenses and co-op fees
- Acquire hands-on experience applying academic knowledge to real world mining operations, fostering the development of technical skills
- Benefit from mentorship and guidance offered by seasoned specialist in their respective fields
- Gain a competitive edge, securing primary consideration for professional positions upon graduation

Salary Range : 4775 - 6042 CAD / month

Salary Description : Salary is commensurate with the number of academic semesters and prior co-op experiences completed.

To all applicants, your interest and effort are sincerely appreciated. While we thank everyone for their application, only those selected for an interview will be contacted. Successful candidates must be willing to satisfy the pre-employment requirements of a pre-employment drug screen and references.

About EVR

EVR is a Canadian steelmaking coal producer. We take our responsibilities to our people, to society and to the environment seriously. The high-quality steelmaking coal EVR produces is an essential input for steel that can be used for constructing products such as wind turbines and critical infrastructure including rail, bridges, hospitals and schools.

Job Requirements

Requirements

- Working towards a Degree or Diploma in a related discipline in Computer Science, Computer Engineering, Business Analytics, or Information Systems
- Basic understanding of .NET/C# software development experience
- Previous experience with related coding (Python, SQL, Perl and VBA, C++, C#)
- Basic understanding of SQL, ERD and data modelling, problem solving, software development, T-SQL, SQL Server experience with SSRS and Power BI development.
- Outstanding problem solving, written and verbal communication skills.
- Curious to learn more about the mining industry and Mining and Geology Engineering systems
- Ability to work efficiently independently as well as part of the team
- Confirmed ability to learn new technologies and platforms quickly, accurately, and efficiently, and demonstrated experience in requirements analysis and specification.
- Self-directed and motivated by sophisticated technical and business challenges, with ability to meet several projects and work schedules simultaneously
- A strong "make it happen", positive, adaptable, and constructive mature work ethic
- Basic understanding of Analytics and Quality Assurance, System Implementation, and support for Engineering systems
- Basic understanding or previous experience in Desktop PC support, SCCM, SCOM and software package creation
- Quality assurance and testing for custom developed solutions with Microsoft technology stack
- Open pit mining experience and/or Geology background would also be an asset.
- Able to articulate complex concepts clearly and in a way a diverse audience would understand

Citizenship Requirement
