The Opportunity

Do you want to gain valuable real-world experience to apply what you learn in your academic classes? Are you interested in finding out what career paths are available to you? If you answered 'yes', then you've come to the right place.

As a co-op student with Planview, you will get the opportunity to gain meaningful, paid work experience to support your academic learning. You will be supported in further developing your skills and have the chance to learn more about software development in a SaaS organization.

?

We're looking for Software Engineer 1 on our VIZ Core?team in Vancouver, BC for an 8-month co-op term.

Software Engineer 1 on the VIZ?team will be challenged with a wide variety of technologies and responsibilities that will give you valuable skills for your career as a Software Engineer. You'll contribute directly to projects that help organizations interpret and harness their workflow data-giving you a fantastic opportunity to apply what you've learned in the classroom to real-world challenges.

Please note that only students currently enrolled in an applicable co-op program at BCIT, UBC, UVic, or SFU will be considered for this role. You must apply through your co-op office/university job board (along with academic transcript) and complete this application to be considered.

What You'll Do

- Work with senior engineers to design and refine data processing architectures that integrate with external tools
- Assist in analyzing problems, defining requirements, and proposing solutions that align with our product objectives
- Contribute to a culture of continuous improvement by providing thoughtful feedback on code, design, and processes
- Learn and apply cloud architecture and data processing best practices, expanding your knowledge base every step of the way using modern technologies such as Spark, MongoDB, PostgreSQL and Redshift
- Develop highly scalable and resilient cloud applications in AWS using Java Springboot
- Improve our CI/CD pipeline in GitHub Workflows
- Collaborate in an environment that values innovation and teamwork, where your ideas and

efforts will make a real impact

- Participate in peer reviews for code reviews and design reviews.
- Analyze, reproduce, and resolve technical and application problems.
- Develop and maintain our automation tools and various test scenarios?

Benefits at Planview

At Planview we highly value our co-op students and their contributions, and we place a strong emphasis on mentorship and guidance to help our Software Engineer 1 build a strong foundation for their professional careers.

As a co-op student with Planview you'll get:

- Expected Salary Range for this role: \$3500 to \$4700 per month
- Weekly office lunches, lunch and learns, and social events
- Unplugged Days: additional time away from work to recharge

If you are looking for a place to gain practical experience, develop your professional skills, and build the future of connected work, apply today!

Diversity, Equity and Inclusion at Planview

As part of our efforts to build a workforce with diverse talent, we encourage applications from Indigenous, Black, and other racialized communities, 2SLGBTQIA+ communities, people with neurodivergence, immigrants, people with disabilities, and other equity deserving groups. In addition to building a diverse workforce, we are committed to fostering an inclusive and accessible experience. Reasonable accommodations for the interview process can be requested by emailing recruitment@planview.com.

Job Requirements

What You'll Bring

- Exposure to software development in any modern object-oriented programming language such as Java/C++/C#
- Basic knowledge of computer science fundamentals, data structures, algorithms, distributed systems, problem solving and asynchronous architectures
- Ability to collaborate and communicate effectively in a team environment
- Self-motivated with the ability to work proactively and seek guidance when needed

Nice to have:

- Experience with Test-Driven Development?
- Interest in big data technologies (e.g., Spark, Apache Kafka)
- Experience with CI/CD tooling such as GitHub Actions, Jenkins?
- Network communications development (e.g. REST, HTTP)?
- Experience with Java (v17), Scala, or other JVM languages

- Familiarity with storage tools (e.g., PostgreSQL, MongoDB)
 - Some knowledge of containers and orchestration (e.g., Docker, Kubernetes)
 - Previous experience working on distributed teams (even for academic group projects)
- Citizenship Requirement** N/A
