Job Description

Job Title: Student Intern - Full Stack Junior Developer (Summer Term)

Job ID: R-5448

Venture outside the ordinary - TMX Careers

The TMX group of companies includes leading global exchanges such as the Toronto Stock Exchange, Montreal Exchange, and numerous innovative organizations enhancing capital markets. United as a global team, we're connecting cross-functionally, traversing industries and geographies, moving opportunity into action, advancing global economic growth, and propelling progress. Through a rich exchange of ideas, meaningful collaboration, and a nimble operating model, we're powering some of the nation's most critical systems, fueling capital formation and innovation, bringing increased opportunity to business visionaries, product ingenuity to consumers, and career exploration to our team.

Ready to be part of the action?

Global Technology Services (GTS) is one of the foundational divisions of the TMX Group, that empowers internal TMX business lines for their technology needs, operations and digital innovation. GTS as a client centric organization focuses on building technology capabilities, enabling our clients with the best technology solutions and providing effective technology financial and resource management processes. The cost effective operation is a key attribute of the GTS execution. GTS is responsible for delivery of all technology initiatives and services across TMX.

In this role, you will have the opportunity to work on both Client and Server side of monitoring and client facing tools. You will work in a fast-paced team with other like-minded developers to implement rich digital user experiences. You will work on enhancing

existing digital assets, such as monitoring tools as well as client facing applications for MX derivatives markets.

This role reports to Senior Manager and Squad Lead, Web Development.

This role is hybrid (2-3 days/week in the office) - based in Montreal, QC.

Key Accountabilities:

- Technical design, and implementation (build/code), of web-based applications and digital interfaces
- Contribute to application improvement and optimization (through code audits, refactoring, caching, architecture changes)
- Work with all team members in troubleshooting issues and bug fixes
- Collaborate in a team on rapid scrum based sprints
- Solve difficult problems

Notes:

• 4 months internship : May 4, 2026 - August 28, 2026

• In order to be considered for the position, you are required to submit your Knockri Assesement

In the market for...

Excitement - Explore emerging technology and innovation, as well as ventures and digital finance that shape the future of global markets! Experience the movement of the market while grounded in the stability of close to 200 years of success.

Connection - With site hubs in some of the world's most multicultural cities, we leverage our size and structure to create rich connections and belonging while experiencing powerful global impact through our work.

Impact - More than a platform, we use our talents to power mission-critical systems that drive global economic advancement, innovation, and growth. As well, our employee-led *Team Impact* spreads social good via our giving strategy.

Wellness - From empathetic leadership to a culture of flexibility and balance, we believe wellness at work creates the maximum yield and a stronger "we". Plus, with a cloud-first and hybrid workstyle, as well as generous time-off and leaves, we support a life well lived!

Growth - From a growth mindset in our work, to expansion in our business, TMX is home to action-takers energized by the achievement of ambitious growth.

Ready to enrich your career with impactful work, leaders who truly care, and the flexibility and programs to help you thrive as part of #TeamTMX ? Apply now.

Please note that our company is not currently sponsoring work permit applications and the applicant must be authorized to work in the country where this position is located.

TMX is committed to creating and sustaining a collegial work environment in which all individuals are treated with dignity and respect and one which reflects the diversity of the community in which we operate. We provide accommodations for applicants and employees who require it.

Job Requirements

Must have:

- University studies in information technology or equivalent
- Knowledge of web development (front/back-end) using Python, Vue.js / Quasar, C++ object programming or equivalent
- Able to implement web services with RESTful APIs
- Able to implement front-end web client applications
- Knowledge of version control software and processes (Git) and CI/CD Builds
- Linux operating systems and command line tools
- Autonomy and initiative
- Fluency in both French and English (written and spoken) is required, as this role involves regular interaction with partners and stakeholders in both languages.

Nice to have:

- Familiarity with software container technologies (Docker, Kubernetes)
- Experience with Node.js
- Ability to work in an Agile environment
- Experience with Nginx web server
- Practical knowledge of the Google work environment (G Suite)

Citizenship Requirement N/A
