<b>Job Description</b>	

**Job Title: Developer Co-op**  
**Job ID: 779808**

#### About this opportunity:

Are you ready to shape the future of wireless technology? Join Ericsson's Radio Product Development team as a Software Developer Co-op and gain hands-on experience in developing cutting-edge 5G and Open RAN technologies. As a co-op student, you'll be immersed in feature development across systemisation, design, coding, and testing of radio platform software. You'll work in a dynamic Agile environment alongside cross-functional teams in systems, hardware, and software, contributing directly to the design and evolution of world-class radio products. We are especially focused on integrating artificial intelligence across all aspects of our daily work-including software development, testing, and troubleshooting-to drive innovation and efficiency.

#### What you will do:

- Develop production software, unit tests, and automated test systems for 5G radio and Open RAN platforms.
- Design and implement advanced test automation strategies using modern technologies, including AI.
- Troubleshoot and resolve issues collaboratively during testing phases.
- Participate in lab-based software/hardware integration testing.
- Review and provide feedback on software designs and test plans.

#### Why join Ericsson?

At Ericsson, you'll have an outstanding opportunity. The chance to use your skills and imagination to push the boundaries of what's possible. To build solutions never seen before to some of the world's toughest problems. You'll be challenged, but you

won't be alone. You'll be joining a team of diverse innovators, all driven to go beyond the status quo to craft what comes next.

### **What happens once you apply?**

DISCLAIMER: The above statements are intended to describe the general nature and level of work being performed by employees in this position. They are not an exhaustive list of all responsibilities, duties and skills required for this position, and you may be required to perform additional job tasks as assigned.

Primary country and city: Canada (CA) || Ottawa (Country/ City)

Job details: Developer

### **Compensation and Benefits at Ericsson**

At Ericsson, we know that our people are the key to our success. We offer a competitive package to help with your individual needs and goals.

#### **Your Pay**

The salary offered is dependent on various factors including, but not limited to, location, and the candidate's combination of job-related knowledge, qualifications, skills, education, training, and experience.

The salary range for this position is

• **Bachelors:** \$25.50/hr - \$34.50/hr

• **Masters:** \$37/hr

### **Job Requirements**

#### **The skills you bring:**

- Currently enrolled in a B.Sc. or M.Sc. program in Computer Engineering, Electrical Engineering, Computer Science, or a related field (preferably in the final year).
- Strong problem-solving skills with a proactive and organized approach.
- Excellent communication and teamwork abilities.
- Experience with Linux development environments and proficiency in C/C++.

#### **Preferred Qualifications:**

- Familiarity with Java, especially for test automation.
- Interest or experience in AI-driven testing tools and emerging automation technologies.
- Basic understanding of wireless communication standards (5G, Open RAN).
- Knowledge of real-time or embedded software systems.
- Exposure to hardware components and system integration.

**Citizenship Requirement** N/A
