Job Description

Join us in building the future of finance.

Our mission is to democratize finance for all. An estimated \$124 trillion of assets will be inherited by younger generations in the next two decades. The largest transfer of wealth in human history. If you're ready to be at the epicenter of this historic cultural and financial shift, keep reading.

About the team + role

We are building an elite team, applying frontier technologies to the world's biggest financial problems. We're looking for bold thinkers. Sharp problem-solvers. Builders who are wired to make an impact. Robinhood isn't a place for complacency, it's where ambitious people do the best work of their careers. We're a high-performing, fast-moving team with ethics at the center of everything we do. Expectations are high, and so are the rewards.

Join our fast-growing and high-impact teams at Robinhood! Our web developers work across our different product areas: Activation, Brokerage, Crypto and Core Experience on our rich client-side web application that powers the next generation of Robinhood, building marketing websites or working on the infrastructure that enables all web developers to work efficiently on the platform.

This role is based in our Toronto office, with in-person attendance expected at least 3 days per week.

At Robinhood, we believe in the power of in-person work to accelerate progress, spark innovation, and strengthen community. Our offices are designed to be collaborative, energizing, and designed to fully support high-performing teams.

What you'll do

- Architect new consumer features and reusable UI paradigms using React, owning significant parts of execution.
- Build and test products to support Robinhood's brokerage operations.
- Collaborate with multiple cross-functional partners to rapidly iterate on the product.
- Design frameworks and tools that empower other developers.

•Work with technologies such as Modern JavaScript (ES6 and up), React, Redux/Immutable, TypeScript, Babel + Webpack,

What we offer

- Market competitive compensation structure
- Quarterly lifestyle wallet for personal wellness, learning and development, and more!
- Time away including company holidays, paid time off, and sick time!
- Lively office environment with catered meals, fully stocked kitchens, and geo-specific commuter benefits

Base pay for the successful applicant will depend on a variety of job-related factors, which may include education, training, experience, location, business needs, or market demands. The expected hourly range for this role is based on the location where the work will be performed.

Toronto, ON

\$33 - \$33 CAD

Click [here](#) to learn more about our Total Rewards, which vary by region and entity.

If our mission energizes you and you're ready to build the future of finance, we look forward to seeing your application.

Robinhood provides equal opportunity for all applicants, offers reasonable accommodations upon request, and complies with applicable equal employment and privacy laws. Inclusion is built into how we hire and work-welcoming different backgrounds, perspectives, and experiences so everyone can do their best. Please review the [Privacy Policy](#) for your country of application.

What you bring

- Currently enrolled in a full-time, degree-seeking program with an expected graduation date in Winter 2026/Spring 2027.
- Fluency in JavaScript and a strong understanding of its fundamentals.
- Understanding of functional and reactive programming paradigms.
- Strong design intuition and user empathy.
- Passion for supporting power users and building developer tools.
- Familiarity with Python/Django and Go is a plus.

Citizenship Requirement N/A
