JOB POSTING INFORMATION

Placement Term	2025 - Fall
 Job Title 	F25 Co-op Software Developer - PIVOT Copperleaf 171395
Position Type	Co-op Position
Job Location	Vancouver, BC
Country	Canada
Duration	8 months
Work Mode	Hybrid
Salary Currency	CAD
Salary	0.0 per hour for 0 Major List
Salary Range \$	Based on experience, \$3850 - \$4150 per month
Job Description	

Copperleaf provides enterprise decision analytics software to companies managing the critical infrastructure we all rely on every day. We help the world's leading organizations decide where and when to invest in their businesses to manage risk, contribute to ESG strategies, deliver against performance expectations, and maximize value for every dollar spent. Join our team as we empower our clients to make the best strategic decisions through our innovative, award-winning solutions.

We are looking for a talented Software Developer Co-Op to join the PIVOT team. We are a cross-functional team responsible for Portfolio and Scenario Optimization as well as geospatial functionality.

Our team's near-term initiatives include implementing a new Scenario Constraints component as well as completing the Program Interpolation feature, both of which will enhance the guided optimization experience. You will be helping with these efforts as well as general development activities such as bug fixing, test writing, and technical improvement.

This is a position for a student who is keen to learn and develop their skillset in a variety of areas. We are a collaborative team, and our members will provide you with mentorship to help you excel in your role.

What experience will you gain?

This position provides an excellent opportunity to gain exposure to the following skills:

- Developing sophisticated, web-based applications, using Angular, typescript, .NET, C#, Cypress, and Oracle DB.
- Agile development process, including participation in feature design, quality assurance, feature breakdown and estimation, and feature demonstration.
- Guidance and hands-on experience using various AI tools to build better features, faster.
- Source code control and the build environment of a large software solution.
- Implementing optimal blend of automated tests.

Job Requirements

Qualifications

Ideally you have the following background, but we also recognize that talent comes in many forms and transferable skills:

- You are a computer science or engineering student with some previous software development experience.
- You have gained exposure to object-oriented languages, web technologies, and UI frameworks.
- You understand how to leverage AI to dramatically increase your productivity and shorten the learning cycle.
- You are self-motivated, flexible, pragmatic, proactive and able to handle a variety of tasks.
- You have strong problem-solving skills, with an ability to identify, isolate, and characterize problems found.
- You have excellent interpersonal skills including teamwork, respect, courtesy, and discretion.

Citizenship Requirement

N/A

Position Start Date

September 02, 2025 12:00 AM
