Job Location	Vancouver, BC
Country	Canada
Duration	8 or 12 months
Work Mode	In-Person
Salary Currency	CAD
Salary	17.85 per hour for 37.5 Major List
Job Description	

The Early Pregnancy Lab, led by Dr. Mohamed Bedaiwy, studies early pregnancy and related clinical problems, with an emphasis on recurrent pregnancy loss (RPL).

We are looking for a hardworking and dedicated undergraduate student to hire as a research assistant. The successful student will contribute to an ongoing RPL research project, an online REDCap database of data from patients seen at the BC Women's Hospital & Health Centre RPL Clinic. This study has been approved by the UBC Ethics Board and supported by the Reproductive Endocrinology and Infertility Division of the Department of Obstetrics and Gynaecology, UBC.

Tasks include patient consenting, patient chart reviews, REDCap data entry, and management of the online REDCap RPL database. Data collection will include (but is not limited to) diagnoses, pregnancy outcomes, demographic information, patient history, prenatal blood screen results, and personal information. Charts will be reviewed within these criteria. These will be added to the already existing data and will complete our dataset.

The student will also be trained in the manuscript writing process for ongoing research studies. The student will be under close supervision by the supervisor as well as one of the clinical research team members.

Job Requirements

Student Learning Components:

The successful candidate will receive proper orientation and required training about the use of online REDCap database. Other learning opportunities for enhancing one's skill will be available as well. Continuous feedback, encouragement and support from the supervisor, other clinical research team members as well as from the REDCap team will be provided. Regular weekly meetings with the faculty members, supervisor and other research team members are expected to determine focus and prioritization. This role will enhance skills for data management and other critical analysis presentation. This experience will further help obtain a bigger project on their own or in collaboration. There is opportunity to make good professional contacts to grow professionally, academically, and personally.

Required Skills:

- Excellent computer skills (e.g., database management, spreadsheets, statistical programs) and proficiency with MS Office (Excel, PowerPoint, Word, Outlook).
- Strong organizational and management skills with the ability to manage multiple projects.

Citizenship Requirement	Canadian & Permanent Residents Preferred
Position Start Date	May 01, 2026 12:00 AM
Position End Date	December 31, 2026 12:00 AM
