#### Job Description

**Job Title: Software Developer Co-op**

**Job ID: 777036**

#### About this opportunity:

We are seeking a motivated, hardworking co-op student to join our radio verification team working on state-of-the-art multi standard radio equipment. The primary focus of this role is to develop AI/ML techniques that increase productivity and to build automation for radio performance verification of new 4G/5G radio products. This position requires on-site presence in the lab.

#### What you will do:

- Develop test automation software in Java to run and orchestrate performance tests on 4G/5G radio equipment.
- Implement AI/ML solutions (prototyping and evaluation) to solve engineering problems such as KPI prediction, and test optimization.
- Experience with Python and ML libraries (scikit-learn, TensorFlow, PyTorch) for prototyping.
- Preprocess and analyze measurement data (logs, KPIs, traces); create features and datasets for model training and evaluation.
- Produce formal documentation for test setups, automation code, and experiment results.
- Integrate ML models or scripts into existing test pipelines and support their use in the lab.
- Collaborate with RF engineers and project managers to deliver verification objectives and meet team goals.

#### Why join Ericsson?

At Ericsson, you'll have an outstanding opportunity. The chance to use your skills and imagination to push the boundaries of what's possible. To build solutions never seen before to some of the world's toughest problems. You'll be challenged, but you won't be alone. You'll be joining a team of diverse innovators, all driven to go beyond the status quo to craft what comes next.

### What happens once you apply?

DISCLAIMER: The above statements are intended to describe the general nature and level of work being performed by employees in this position. They are not an exhaustive list of all responsibilities, duties and skills required for this position, and you may be required to perform additional job tasks as assigned.

Primary country and city: Canada (CA) || Ottawa

Job details: Developer

### Compensation and Benefits at Ericsson

At Ericsson, we know that our people are the key to our success. We offer a competitive package to help with your individual needs and goals.

#### Your Pay

The salary offered is dependent on various factors including, but not limited to, location, and the candidate's combination of job-related knowledge, qualifications, skills, education, training, and experience.

The salary range for this position is

- Masters: \$37/hr

### Job Requirements

#### The skills you bring:

- Enrolled in a Masters degree in Electrical Engineering, Computer Engineering, Computer Science, or related discipline.
- Coding experience in Java (highly preferred).
- Good understanding of AI/ML models and workflows (supervised/unsupervised learning, evaluation metrics).
- Excellent English communication skills (written and spoken).
- Good time management, prioritization and problem-solving skills.
- Willingness and ability to work on site and in the lab.

**Citizenship Requirement** N/A
