Position Title: Embedded Software DevSecOps Engineer

Employment Type: Student - Co-op/Intern

Location: Ottawa ON, Onsite

Welcome to Lumentum! We're all about harnessing cutting-edge tech to create a brighter, more connected future. We are the leaders in optical and photonic products, working at the intersection of innovation and impact. Here's what we're up to:

Cloud & Networking

- Powering high-speed data transmission for cloud data centers, AI/ML, enterprise systems, and communication services. Think streaming, gaming, and next-gen tech-we make it happen.

Industrial Tech

- Innovating with state-of-the-art lasers used in industries like EVs, solar power, display technology, and semiconductors. We're enabling the future of green tech and advanced manufacturing.

At Lumentum, we're committed to collaboration, inclusivity, and empowering our team to shine. Together, we're shaping the tech of tomorrow while supporting a culture where everyone thrives.

The Opportunity...

- 8 month term (preferred): May 2026 to December 2026
- 4 month term: May 2026 to August 2026
- Pay Range: \$24-35/hr
- Existing vacancy

Why You'll Love This Role

Do you like puzzles and solving challenging problems?

Are you a collaborator who works well in a team environment?

Do you value learning and continuous improvement?

Then we have the job for you!

This co-op position is an opportunity to work in the research and development team of a photonics & fiber optics company that is passionate about meeting the needs of our customers.

What You'll Be Doing

- Contributing to the ongoing development of automated solutions for our next generation optical transport products;
- Solving complex technical problems;
- Working in close collaboration with the Firmware R&D teams; and,
- Improving the quality and robustness of firmware and hardware tests.

Job Requirements

What We're Looking For

Recommended Education:

- **2nd, 3rd or 4th year** student pursuing a degree in Computer Engineering, Computer Science or equivalent.

Skills:

- Desire to succeed and to do things right the first time;
- Strong problem-solving skills;
- Excellent verbal and written communication skills;
- Strong object-oriented software design and implementation (any language);
- Experience with any or all of the following: Git, GitHub, Bash, PowerShell, ChatGPT, Copilot, C#, Python, Javascript, XML, gRPC, Jira;
- Experience in instrumentation and automation;
- Understanding of optical systems;
- Experience with optical instruments and optical fibers.

Citizenship Requirement N/A
