<b>Job Description</b>	

#### Why Join HH Angus? The People. The Projects. The Potential.

Through more than 100 years of experience, we have built a reputation for delivering superior engineering design and innovative solutions for the built environment to industry leaders, in Canada and internationally. While we are proud of our long history and years of experience, we are passionate about innovation and remain at the forefront of design by keeping up to date with current technology, standards, and practices. We are proud of our unrivaled culture, the exciting and diverse projects we have to offer, and the numerous growth opportunities available. Past co-ops within our Angus Connect Technology Group have gone on to become technical specialists and managers within the team! Come grow with us.

Location: Vancouver (Suite 453, 595 Burrard Street, Bentall 3, Vancouver, British Columbia V7X 1G4 Canada) - Hybrid

For more information on this department and its functions, please visit our website at <http://www.angusconnect.com/>

HH Angus is committed to providing an accessible work environment and accommodates applicants with disabilities upon request. We thank all candidates for their interest, but only qualified candidates will be contacted. We are an equal-opportunity employer

#### Job Requirements

Learning Opportunities:

- Learn and apply the fundamentals of communications and security systems design.
- Work on important public infrastructure projects such as world-class hospitals and universities.
- Participate in information-gathering sessions with clients and other stakeholders through multiple methods (interviews, user group meetings, and site visits) to generate digital technology recommendations pertinent to the project and client.
- Grow your knowledge of workflows and construction requirements by working side-by-side with team members during all stages of a project, including visits to project sites to review the progress of technology systems in installation and testing.
- Learn and use Revit, a leading Building Information Modeling (BIM) technology.
- Make a lasting impact by developing workflow tools that will help our team.
- Practice your public speaking and communication skills by participating in project meetings with team members, architects, engineers, and clients.

About you:

- Enrolled in an engineering or computer science program.
- Forward thinking, eager to learn best practices and contribute with innovative ideas.
- Display ability to learn quickly and driven to broaden knowledge base.
- Strong documentation skills with attention to detail and accuracy
- Ability to collaborate and work effectively with multi-disciplinary teams.
- Experience with design software's such as Revit or AutoCAD is considered an asset, but not required.
- Passionate about the application of digital technology in complex facilities and the built environment.

<b>Citizenship Requirement</b>	N/A
<b>Position Start Date</b>	January 05, 2026 12:00 AM
<b>Position End Date</b>	August 28, 2026 12:00 AM
