Job Description	

## Cloud Service Software Developer

Location: Vancouver, British Columbia

Inspire the World, Create the Future

**Do you believe in the power of technology to help shape a brighter future and a stronger global community? Are you inspired by the possibilities? Are innovation, camaraderie, and the pursuit of excellence part of your innate drive? Then you've got what it takes to succeed at Samsung.**

Identity Access Management (IAM) platform aims to centralize the process of verifying user identities, managing access levels to different systems within an organization, enforcing security policies, streamlining IT administration, and enhancing data security. Samsung's Samsung Account (SA) team is building our next generation of IAM platform now and target to be one of the best solutions in the market.

### Why We Want You

Samsung is looking for an enthusiastic Co-Op student to join the Samsung Vancouver SA team. You have a passion for making cloud applications, and willingness to participate in the

full development cycle from requirements and development, performance and automation, and learning how to deploy highly scalable solutions.

### **What You'll Do**

- You will join and collaborate with a talented team of the best and brightest Cloud Service Engineers, DevOps and Performance Engineers who work on leading edge technologies and projects that touch millions of people
- Be constantly challenged to learn and grow with new technologies and complex problems
- Have shared ownership of the cloud-based products and services you build
- Implement highly scalable systems in a cloud environment
- Work in a multi-disciplinary scrum team
- Collaborate with other groups across the organization and other projects

### **Additional Information:**

- \$20-\$27/hr (Co-Op pay will be determined based on a number of factors and may vary depending on job-related knowledge, completed study terms, relevant skills, and experience)
- 8 months (January - August)
- Hybrid (Monday-Thursday in office, located in Vancouver)
- Interviews will be 30-45 minutes with selected candidates

### **Job Requirements**

### **Who You Are**

- First and foremost, you are a team player and know how to work well with others
- Strong analytical mind and start with the end in mind when designing your applications
- Passion for solving complex problems and have a high degree of aptitude when it comes to learning new technologies
- Active participant in the programming community (GitHub, SourceForge, Blogs, etc.)
- Have done at least one side project that was not school related

### **What You'll Bring**

- Must have intermediate experience with JAVA. Kotlin is a plus
- Knowledge of Relational Database Systems (Entity Relationship Diagrams, SQL Queries)
- Performance Testing and QA Automation is a big plus
- Scripting Languages (BASH, Python)
- Knowledge of SQL (MySQL and Postgres preferred) and NoSQL

**Citizenship Requirement** N/A
