Position Overview

Autodesk is looking for two interns to join the Autodesk Platform Services Data Models Team. The team delivers high-value, exabyte-scale, and cloud data platform components powering desktop, mobile, and web products. This enables our product teams to build cohesive in-product data experiences, our partners to integrate and expand our data, and our end-users to work with their data across all Autodesk products.

You will report to the Senior Manager, Software Development Manager based in Canada, and the role is a hybrid based in Montreal. This is an exciting opportunity to be part of and to help evolve developing the engineering discipline in a lean/Agile environment and to contribute to an organization committed to continuous improvement. Our team enables real-time data-centric experiences at scale to make a difference for all of those who imagine, design, and make our world. Please note that this is a position for Summer 2026 (May - August 2026 work term).

Responsibilities

- Involve with all aspects of software development, working to create and maintain the most reliable, secure, performant, and high throughput service for our customers by applying cloud technology
- Partner with product managers, product owners, software architects, and other development teams to iteratively turn high-level requirements into product enhancements that are delivered to customers incrementally
- Contribute to software design and architecture by using cloud design patterns and injecting your cloud expertise into the entire

development lifecycle

- Document and present your ideas and solutions thoroughly
- Work with some of the smartest and also teach us
- Experiment, learn, and grow
- Deliver code that millions will use

Job Requirements

Minimum Qualifications

- Pursuing a Bachelor's degree in Data Analytics, Statistics or Computer Science
- Java Knowledge is a strong preferred skill
- Experience with a large scale, distributed application design and familiarity with application development is a strong plus
- Experience with object-oriented design patterns
- Experience with Databases and database design principles

About the Canada Intern Program

The 2026 Canada program runs for 16 weeks (May 4th - August 21st). All internships are paid. As an intern, you will contribute to meaningful projects, be mentored by industry leaders, participate in tech talks and other activities designed to support your personal and professional development. Our Internships align with Autodesk's Flexible Workplace approach, which is designed to meet the needs of our business while providing flexibility in support of office, remote and hybrid work preferences.

Citizenship Requirement

N/A
