#### **Our Purpose**

At Deloitte, our Purpose is to make an impact that matters. We exist to inspire and help our people, organizations, communities, and countries to thrive by building a better future. Our work underpins a prosperous society where people can find meaning and opportunity. It builds consumer and business confidence, empowers organizations to find imaginative ways of deploying capital, enables fair, trusted, and functioning social and economic institutions, and allows our friends, families, and communities to enjoy the quality of life that comes with a sustainable future. And as the largest 100% Canadian-owned and operated professional services firm in our country, we are proud to work alongside our clients to make a positive impact for all Canadians. By living our Purpose, we will make an impact that matters.

--

**Do you want to work in a fast growing and changing environment, with like-minded people who are eminent in their respective technical fields, developing innovative solutions to problems facing the development and delivery of large-**

scale construction projects?

## What will your typical day look like?

The Capital Projects team provides a variety of advisory and consulting services to capital project owners, contractors, architect and engineering firms, governmental agencies, developers, and other organizations with a significant interest in the successful development and delivery of a capital project. Our team of experienced engineers, quantity surveyors, construction managers, architects, and auditors possess comprehensive design and construction industry experience, and practical and effective project management, consulting, and communication skills, as well as strong professional qualities. Furthermore, through our access to the global network of member firms, the Deloitte Strategy, Risk and Transactions Infrastructure and Capital Projects group offers a broad range of integrated services in varied professional disciplines and diverse locations. ?

?

We are rapidly growing our Capital Projects practice and are looking for a co-op student to support our team. As a co-op, you will be responsible for supporting various aspects of our assignments, including:

- Assisting in project management oversight assessments;
- Performing construction cost or schedule assessments;
- Assessing management or construction contract compliance and audit;
- Recommending project risk management solutions strategically aligned with client risk tolerances;
- Performing process and control reviews and organizational assessments;
- Developing business processes and/or setting up project controls and governance;
- Evaluating and developing construction claims including the review, analysis and development of claims for dispute resolution; and,
- Contributing to creating value for our clients with their large capital projects.

## About the team

Our Capital Projects team is comprised of some 40 professionals nationally who are dedicated to helping our clients successfully deliver large-scale capital projects and programs on time and on budget. We also help our clients reduce risk and achieve the best value from their portfolios of capital projects.

Deloitte's Capital Projects team brings practical solutions and adds value at every stage of the project lifecycle for clients in highly competitive multi-billion-dollar international engineering and construction industries. We are experienced consultants, project and program managers, planners and project controllers, architects, engineers, construction managers, contract managers, quantity surveyors and related management functions. Through our access to the Deloitte global network of member firms, the Capital Projects team offers a broad range of integrated services in varied professional disciplines and diverse locations.

We bring decades of global industry experience which is matched with Deloitte's enviable reputation as a global Professional Service firm and employer of choice.

### Job Requirements

## Enough about us, let's talk about you

In this role, the expected qualifications are:

- Working towards completing a post-secondary degree or diploma in Engineering, Architecture or construction-related discipline; computer science
- Excellent visual, written and oral communication skills, particularly articulating messages using Microsoft tools (e.g., PowerPoint, Word, etc.);
- The ability to thrive in a team and collaborative setting, contribute and share ideas, regularly seek guidance and feedback, and work to ensure the success of the team;
- A willingness to learn, and a strong commitment to professional and client service excellence; and,
- The ability to meet deadlines and produce high quality outputs with a high degree of task ownership.

**Quebec Location:** We require basic English language skills to meet the needs of our clients. In the context of mandates, you could work for clients with activities outside of Quebec and where the first language is English.

### Citizenship Requirement

N/A
