Job Description	

IGM Financial Inc. is a leading wealth and asset management company in Canada, managing approximately \$271 billion in assets. It offers financial planning and investment services to over two million Canadians through IG Wealth Management and Mackenzie Investments.

Founded in 1926, IG Wealth Management is a key part of IGM's business model, providing comprehensive wealth management services to Canadian financial advisors and their clients.

With a vision to inspire financial confidence, IG Wealth Management is recognized as one of Manitoba's Top Employers, Canada's Top 100 Employers, and Best Diversity Employers, aiming to innovate the industry and support Canadians in achieving their financial goals.

Join our team to engage in continuous learning and skill development in a supportive environment. Experience the best of both worlds with our hybrid work environment, where you spend three days a week in the office, connecting, collaborating, and enjoying quality time with your amazing colleagues! Our Values: Be better; we strive for improvement in everything we do. Be accountable; we foster clarity and are empowered to act responsibly. Be a team; we are united to drive collective impact to achieve our goals.

Position

We are currently hiring an intern looking for a summer term position, May to August 2026, in our Winnipeg office. Candidates must be enrolled in an undergraduate program and plan to return to school after completing the internship to be eligible to apply.

This position is responsible for supporting the Data Science team in Analytics and Data Engineering tasks. The student will assist in developing datasets, models, and reports which are used to understand our business and meet strategic objectives. This position provides a great opportunity for a university student to gain practical experience in the fields of AI and Data Science.

Responsibilities:

- Designing and developing relevant datasets, reports and analysis for operational and strategic initiatives
- Work with data from multiple sources and databases (manipulate data, prepare data for machine learning)
- Analyze structured and unstructured data, organize findings and translate into actionable insights
- Learn various modelling approaches and understand how to evaluate best performance considering model metrics and appropriateness for business interpretation
- Collaborate closely with relevant teams to ensure models/solutions can be deployed
- Participate in the development, testing, implementation, documentation and continuous improvement of datasets and data models as a member of the Data Science team

Job Requirements**Requirements:**

- Currently enrolled in a post-secondary program in Data Science, Computer Science, Management Analytics, Statistics or a similar field
- Knowledge of SQL, Python, and Git
- Familiarity with Looker, Tableau, Power BI, and/or other BI and reporting tools is a plus
- Exposure to cloud technologies (e.g. Google Cloud, Azure) is beneficial
- Good critical thinking skills - conceptualizing, analyzing, synthesizing, and evaluating
- Willingness to learn how to develop code as part of a team, including clear documentation and code reviews

Citizenship Requirement N/A

APPLICATION INFORMATION

Application Procedure Through Employer Website

Special Application Instructions

Please click the "I intend to apply to this position" button on SCOPE and also submit your application via the employer's website.
