#### Job Description

Req ID: R-0000136540

##### Job Description

As an GenAI Engineer - Internal Audit Services, you will be a part of building consistent, relevant, and impactful data products, reporting solutions as well as visualizations for Internal Audit (IA). In collaboration with cross-functional teams, you will be involved in a variety of challenging assignments as well as networking opportunities.

RBC Internal Audit leverages a unique perspective - with a coordinated view across the entire business - to deliver valuable advice that not only gives assurance, but that illuminates a bigger picture, connects dots, builds best practices and broadens possibilities.

##### **What will you do?**

- Collaborate with data scientists, product managers, data engineers and auditors to design, develop and deploy data solutions within the IA Ecosystem
- Gather details from business and stakeholders in order to determine project scope

##### **What's in it for you?**

We thrive on the challenge to be our best, progressive thinking to keep growing, and working together to deliver trusted advice to help our clients thrive and communities prosper. We care about each other, reaching our potential, making a difference to our communities, and achieving success that is mutual. At RBC, you will have opportunities to:

- Interact with leaders who support your development through coaching and managing
- Network and build lasting relationships with students from diverse backgrounds from across Canada
- Make a difference and lasting impact through meaningful work
- Work in a dynamic, collaborative, progressive, and high-performing team

*We encourage you to apply as soon as possible as we accept applications on a rolling basis, but please note that the formal application deadline is Sep 28, 2025 at 11:59 PM ET. Should you be selected to progress, someone from our team will reach out*

directly to provide instructions on next steps. Otherwise, feel free to check for progress updates by logging in to your RBC profile. If the status has not changed, it denotes the fact that your application is still under review.

### **Job Skills**

Cascading Style Sheets (CSS), Communication, Git, GitHub, Hyper Text Markup Language (HTML), JavaScript, Machine Learning, Microsoft Excel, Pandas (Software), Pandas Python Library, Python (Programming Language)

### **Job Requirements**

**What do you need to succeed?**

**Must-have**

- Currently enrolled in Computer Science, Data Science, Engineering, or related degree program.
- Strong understanding of Python and JavaScript
- Knowledge of how Large Language Models work
- Available for 8 month Co-op commitment

**Nice-to-have**

- Enthusiasm, passion and drive to investigate and understand trends and new technologies
- Knowledge of JavaScript frontend frameworks, such as React, Angular, or Vue (preferred)
- Experience with Python LLM frameworks, such as LangChain, LangGraph, or LlamaIndex
- General understanding of web development concepts, including HTTP requests, server vs client, authentication, etc.
- Experience with version control such as GitHub

**Please note:**

In order to be eligible for these student positions, you must either:

- Be returning back to school after the work term end-date; or
- If you are not returning back to school (i.e. are graduating immediately after the work term), you must require the full work term as a mandatory component in order to graduate successfully

**Citizenship Requirement** N/A
