Job Description

Job Title: DevOps Engineer Specialist (Student Position)

Job ID: 4562

Location: Winnipeg, MB, CA f Toronto, ON, CA f London, ON, CA

This is a student position that is 4 months in duration for the term: January-April. You must be a student registered in a Canadian College or University.

This position is for students returning to school after their work term or requiring a placement as requirements for graduation. While not required, preference will be given to students enrolled in a registered Co-op program.

Applicants are required to submit both their resume and their most recent unofficial transcript as part of the application process.

Canada Life is seeking technology students with strong achievements in their academic studies and practical practice. This role is hybrid and requires the successful candidate to work on-site at least 3 days per week in one of our head office locations: London, Toronto, or Winnipeg.

As an DevOps Engineer Specialist (Student Position) you are a key member of a highly respected, professional, DevOps team and will have an opportunity to work in one of the following possible areas:

- Cloud Infrastructure

•DevOps

What you will do

- Accountable for the monitoring, maintenance and support of systems, services and tools, as well as deploying net-new capabilities in accordance with DevOps principles.
- Will participate in squad activities through the development, maintenance and automation of efficient tools and processes.
- Ensures continuous, high velocity delivery and automated deployment using software provisioning, configuration management, source code management and/or team collaboration applications which enable the business to produce products faster through delivery supply chain automation thereby delivering customer value. This will include building new solutions, migrating existing capabilities to the new digital stack, automating current processes & interfaces and assisting in formalizing infrastructure standards.
- The incumbent will be expected to stay current with technical advancements and bring new thoughts and patterns to the organization.?
- Requires broad technical knowledge and experience across a variety of IT areas, including infrastructure, development, operations, and quality assurance.

Our DevOps Engineer Specialist (Student Position) participate in a variety of team building activities, conferences, and professional development activities that help to strengthen skills and contribute to building strong relationships among our Technology staff.

The base salary for this position is between **\$40,300 - \$67,000** annually. This represents base salary only and does not represent other variable compensation components of our total compensation (i.e. annual bonus, commission etc). If you are selected to move forward in our recruitment process, your recruiter will be able to discuss additional details of our total rewards program with you.

For our student opportunities, the base salary will be dependent on the number of work terms you have completed along with other factors depending on your program.

Career opportunities will be open a minimum of 5 business days from the date of posting, closing dates will vary depending on the search activity. All applications received will be reviewed on a rolling basis.
