#### Job Description

**Job Title:** Software Developer, Summer 2025 (Co-op/Internship) - 4 Months

You will be part of a team that is responsible for developing and maintaining software applications. You will be responsible for analyzing user requirements, designing software solutions, and implementing software applications. You will be responsible for testing software applications and ensuring that they meet the required quality standards. You will be responsible for documenting software development processes and results. You will be responsible for collaborating with other team members and stakeholders. You will be responsible for staying up-to-date on the latest software development technologies and trends. You will be responsible for ensuring that software applications are secure and compliant with applicable laws and regulations. You will be responsible for ensuring that software applications are scalable and performant. You will be responsible for ensuring that software applications are easy to use and maintain. You will be responsible for ensuring that software applications are delivered on time and within budget. You will be responsible for ensuring that software applications are supported and maintained throughout their lifecycle. You will be responsible for ensuring that software applications are continuously improved and updated. You will be responsible for ensuring that software applications are aligned with the organization's strategic goals and objectives. You will be responsible for ensuring that software applications are aligned with the organization's values and culture. You will be responsible for ensuring that software applications are aligned with the organization's mission and vision. You will be responsible for ensuring that software applications are aligned with the organization's core competencies and strengths. You will be responsible for ensuring that software applications are aligned with the organization's core values and principles. You will be responsible for ensuring that software applications are aligned with the organization's core beliefs and assumptions. You will be responsible for ensuring that software applications are aligned with the organization's core identity and brand. You will be responsible for ensuring that software applications are aligned with the organization's core purpose and reason for being. You will be responsible for ensuring that software applications are aligned with the organization's core values and principles. You will be responsible for ensuring that software applications are aligned with the organization's core beliefs and assumptions. You will be responsible for ensuring that software applications are aligned with the organization's core identity and brand. You will be responsible for ensuring that software applications are aligned with the organization's core purpose and reason for being.

- Translates user needs into technical specifications by understanding, conceptualizing, and facilitating technical requirements from user.
- Analyzes, develops, tests, and implements new software programs, and documentation of entire software development life cycle execution.
- Performs preventative and corrective maintenance, troubleshooting and fault rectification of system and core software components.
- Ensures that code/configurations adhere to the security, logging, error handling, and performance standards and non-functional requirements.
- Evaluates new technologies for fit with the program/system/eco-system and the associated upstream and downstream impacts on process, data, and risk.
- Follows release management processes and standards, and applies version controls.
- Assists in interpreting and documentation of client requirements.
- Focus is primarily on business/group within BMO; may have broader, enterprise-wide focus.
- Exercises judgment to identify, diagnose, and solve problems within given rules.

- Works independently on a range of complex tasks, which may include unique situations.
- Broader work or accountabilities may be assigned as needed.
