Job Description	

Role Title

Software Engineer Co-op Student (Summer Term)

Purpose of role

The Software Engineer Co-op in IT offers an opportunity to build a wide variety of enterprise applications within a team-based environment. As a co-op student, you will work closely with our experienced architects and engineers to develop, test, and implement application including machine learning models and algorithms. This is an excellent opportunity to gain hands-on experience in a collaborative environment. You'll find opportunities to continuously learn, research on technologies, share knowledge within your team.

Job Description

Key Responsibilities:

- Assist in the development software applications
- Develop and implementation of AI/ML models and algorithms.
- Conduct data preprocessing and analysis to support model training.
- Collaborate with team members to design and execute proof-of-concepts.

- Producing clear and maintainable code
- Document code and maintain version control.
- Participate in team meetings and contribute to project discussions.
- Investigating, learning and applying new technologies/processes
- Participating in design/architectural discussions

Key Qualifications:

- Currently enrolled in a Bachelor's program in Computer Science, Engineering, or a related field.
- Strong programming skills in Python, .NET, Java or similar languages.
- Familiarity with machine learning frameworks such as TensorFlow, PyTorch, or scikit-learn.
- Familiarity with Microsoft Azure DevOps
- Basic understanding of data preprocessing, feature engineering, and model evaluation.
- Excellent problem-solving skills and attention to detail.
- Ability to work independently and as part of a team.
- Strong communication skills and willingness to learn.
