**Salary Currency** CAD  
**Salary** 0.0 per hour for 0 Major List  
**Salary Range \$** Based on experience, \$3850 - \$4150 per month  
**Job Description**

Are you a curious, creative problem-solver who loves to build great software? We're looking for motivated and talented software developers to join our team for a co-op term! You'll get the chance to work on real projects, contribute to our design system, and learn from a collaborative team of designers and developers.

#### What You'll Do

You'll dive into multi-week projects that challenge your creativity and coding skills. From brainstorming ideas to shipping polished features, your work will make a real impact. Projects may include:

- Designing and building new UI components and data visualizations
- Enhancing our visual regression testing framework
- Improving and maintaining existing components in our design system
- Creating prototypes to explore new ideas

You'll be part of a team that values clean code, great design, and user-friendly experiences. We use AI throughout the development process and are always keen to explore new ways to make the development process more efficient.

#### What You'll Learn

This role is a great opportunity to build hands-on experience with:

- Building sophisticated web applications using Node.js and TypeScript
- Frontend development with HTML5, CSS3/SASS, JavaScript, and Angular
- Working with technologies like D3, Redux, RxJS, NestJS, and Docker
- Writing unit tests, automation tests, and visual regression tests
- Understanding large-scale system design and how changes affect the big picture
- Using source control and build tools in a production software environment

## Job Requirements

### About You

You are a 3rd or 4th year Computer Science or Engineering student who:

- Has some previous experience in software development (through work terms, side projects, or coursework)
- Is comfortable with object-oriented programming, web technologies, and databases
- Pays attention to detail and writes clean, maintainable code
- Is self-driven, adaptable, and ready to take on a variety of tasks
- Communicates well and enjoys working as part of a team

We're not hung up on specific tools or languages-what matters most is your passion, creativity, and the quality of your work. If you've built something cool (a project, a portfolio, a hackathon app), we'd love to see it.

### Citizenship Requirement

N/A

### Position Start Date

September 02, 2025 12:00 AM

### Position End Date

April 30, 2026 12:00 AM

## APPLICATION INFORMATION
