Job Description

Req ID: R-0000138183

Job Description

As part of RBC Global Asset Management, the Performance team plays a critical role in delivering accurate and timely investment performance analysis and reporting on a global scale. As a team member, you will contribute to the continuous improvement of reporting processes and analytical tools. This is an exciting opportunity to collaborate with investment teams and make a meaningful impact in a dynamic, fast-paced environment.

What will you do?

This role focuses on software development, with an emphasis on automating and digitizing legacy processes. You will support the Fixed Income Performance team, with key responsibilities including:

- Develop and maintain full-stack software solutions to support performance reporting and analysis.
- Optimize existing software to improve efficiency and performance.
- Manage databases effectively, including performing data engineering tasks such as normalization and optimization.
- Write complex queries to extract and analyze data accurately.
- Contribute to the development and enhancement of new and existing web applications.
- Oversee project management tasks to ensure timely and successful delivery of initiatives.
- Design and develop precise, strategy-specific performance reports tailored to various investment strategies.

What's in it for you?

We thrive on the challenge to be our best, progressive thinking to keep growing, and working together to deliver trusted advice to help our clients thrive and communities prosper. We care about each other, reaching our potential, making a difference to our communities, and achieving success that is mutual. At RBC, you will have opportunities to:

- Interact with leaders who support your development through coaching and managing

- Network and build lasting relationships with students from diverse backgrounds from across Canada
- Make a difference and lasting impact through meaningful work
- Work in a dynamic, collaborative, progressive, and high-performing team

Job Skills

Communication, Detail-Oriented, Python (Programming Language), Structured Query Language (SQL)
