Job Description Java Backend Developer Co-op

Location: Vancouver, British Columbia

Inspire the World, Create the Future

Do you believe in the power of technology to help shape a brighter future and a stronger global community? Do the possibilities inspire you? Are innovation, camaraderie, and the pursuit of excellence part of your innate drive? Then, you've got what it takes to succeed at Samsung.

The Samsung R&D Canada Knox Solutions group is looking for a co-op student to implement the backend services required for many cloud-based services. Your primary focus will be developing backend logic using Java, Spring Boot, NoSQL and SQL. A basic understanding of REST API is necessary.

What You'll Do

- Implement cloud-based products and services
- Integrate with external customer and 3rd party systems
- Write sound code, perform code reviews, write unit tests
- Write documentation
- Participate in the scrum team
- Continuously discover, evaluate, and implement new technologies to maximize development efficiency.

Additional Information:

- \$20-\$27/hr (Co-Op pay will be determined based on a number of factors and may vary depending on job-related knowledge,

completed study terms, relevant skills, and experience)

- 8 months (May-December)
- Hybrid (Monday-Thursday in office, located in Vancouver)
- Interviews will be 30-45 minutes with selected candidates

Job Requirements

What You'll Bring

- Knowledge or experience in one or more of these areas: Spring Boot and SQL or NoSQL
- Basic understanding of REST API
- General understanding of web-related protocols (ex. TCP/IP, REST, HTTP, TLS)
- Have basic computer science fundamentals in data structures, design patterns, algorithm design, and complexity analysis
- Outstanding interpersonal and communication skills

Bonus / Nice to have

- Although the area of expertise is Backend Java development, not being afraid to touch other areas like the Frontend or even the infrastructure code is a great plus. A complete developer is a good problem solver, independent of the technology used.
- Knowledge & experience in AWS, SQL, No-SQL, OLTP and OLAP, micro-services architecture, containerization, and orchestration (ex., Docker, Kubernetes, etc.)
- Knowing ETL Data processing

Citizenship Requirement N/A
