Job Description	

Who we are:

Geotab ® is a global leader in IoT and connected transportation and certified "Great Place to Work™." We are a company of diverse and talented individuals who work together to help businesses grow and succeed, and increase the safety and sustainability of our communities.

Geotab is advancing security, connecting commercial vehicles to the internet and providing web-based analytics to help customers better manage their fleets. Geotab's open platform and Geotab Marketplace ®, offering hundreds of third-party solution options, allows both small and large businesses to automate operations by integrating vehicle data with their other data assets. Processing billions of data points a day, Geotab leverages data analytics and machine learning to improve productivity, optimize fleets through the reduction of fuel consumption, enhance driver safety and achieve strong compliance to regulatory changes.

Our team is growing and we're looking for people who follow their passion, think differently and want to make an impact. Ours is a fast paced, ever changing environment. Geotabbers accept that challenge and are willing to take on new tasks and activities - ones

that may not always be described in the initial job description. Join us for a fulfilling career with opportunities to innovate, great benefits, and our fun and inclusive work culture. Reach your full potential with Geotab. To see what it's like to be a Geotabber, check out our blog and follow us @InsideGeotab on Instagram. Join our talent network to learn more about job opportunities and company news.

Who you are:

We are always looking for amazing talent who can contribute to our growth and deliver results! Geotab is seeking a Software Developer Intern who will support other developers within Geotab by contributing to the architectural and technical advancement of internal platforms and services. If you love technology and are keen to join an industry leader while participating in the developer experience and the foundational systems that power internal teams - we would love to hear from you!

What you'll do:

As a Software Developer Intern within Geotab, your key areas of responsibility will be contributing to the advancement of internal platforms and services that support Geotab's development teams. This will involve assisting in the development and improvement of internal tools and automation designed to streamline developer workflows and boost productivity. You will also be involved in tasks related to the architecture and technical evolution of these foundational systems.

To be successful in this role, you will need to be a self-starter with strong written and verbal communication skills, and have the ability to quickly understand complex, technical concepts related to internal development platforms. In addition, the successful candidate will have strong analytical and time management skills with an ability to identify needs, develop effective solutions, and manage projects through completion, all within the context of enhancing internal developer tools and systems. You will need to work closely with the other members of the development team and product design teams.

The opportunity:

- 8 - 12 month Hybrid work-term beginning May 2026.
- Full-time, paid internship: Monday - Friday, 37.5hrs/week.
- Your first week at Geotab begins with 'GEO Launch' - a one-week Employee Orientation. [Click here to learn more!](#)
- Learn more about the Geotab Campus Program [here](#).
- This posting is for an existing vacancy.

How you'll make an impact:

- You will contribute to the enhancement of Geotab's internal development platforms and services, directly supporting the architectural and technical roadmap.
- You will assist in developing and improving internal tooling, leading to more efficient workflows and increased productivity for other developers.
- Your contributions to testing and quality assurance will help ensure the reliability and stability of essential internal systems.
- Through collaboration with senior developers and other stakeholders, you will gain practical experience and contribute to real-world software development projects.

Job Requirements

What you'll bring to the role:

- Education Requirements:
- Pursuing a Degree or Diploma in Computer Science, Math, Software Engineering, or a related field is preferred.
- Soft Skills:
- Eager to learn and contribute in a fast-paced environment.
- Excellent communication and problem-solving skills.
- Ability to quickly understand complex, technical concepts.
- A Willingness to participate in team discussions and support fellow team members in a collaborative environment.
- Technical Skills - Willingness to Learn is Key:

- Basic understanding of object-oriented programming concepts.
- Knowledge of backend systems such as C# .NET Core / .NET 7+. IMP.
- Understanding of version control principles (e.g., Git).
- Interest in exploring cloud computing (e.g., GCP).
- Familiarity of database design and relational databases (e.g., PostgreSQL).
- Foundational knowledge of RESTful API design and development.
- Exposure to web development technologies (e.g., HTML, CSS, JavaScript, React).

Citizenship Requirement N/A
