**Fall Co-op - Software Engineer (ISS Team)**  
16833BR

#### **About the role**

The candidate will participate in a structured cooperative educational/work program between Lockheed Martin Canada Inc. (Lockheed Martin) and a college/university where they are enrolled in an accredited degree program directly related to skills required by the company. Candidate will perform assigned tasks in technical/engineering disciplines e.g., Computer Science, Software Engineering, Computer Engineering, Electrical Engineering.

Specifically, the candidate will perform software engineering work related to the In-Service Support (ISS) of the Combat Management System 330 (CMS 330) for the Halifax Class Frigates at Canadian Forces Base (CFB) Halifax.

#### **This may include:**

- Requirements engineering
- Software design
- Programming and debugging in both C++ and Java
- Unit testing and documentation
- Statusing & Metrics Reporting
- Various other tasks as required

#### **What we offer you**

We walk our talk when it comes to work/life balance! Your physical, mental and financial wellbeing matters to us. On top of working

in a highly supportive, friendly, respectful environment, this is what you can expect when you join our team as a Regular Full-Time employee:

- Flexible, compressed work schedules, depending on business requirements, where you have the option of Fridays off, as well as the possibility to work remote part-time
- Competitive compensation
- Time to recharge with vacation, personal days, holidays, and parental leaves
- Comprehensive Family Medical, Dental and Vision coverage available on your first day of employment, along with:
- Virtual Health Care (24/7 access to medical professionals)
- A Wellness Spending Account to aid in your wellness journey
- Employee & Family Assistance Program (EFAP) which includes free face to face counselling sessions
- Medical Travel Insurance
- Onsite fitness facilities at our main office locations
- A Registered Retirement Savings Plan that includes matching company contributions on your first day of employment, that also includes access to Financial Advisors providing investment advice and comprehensive financial planning
- Employee discounts to save on goods, services and various recreational activities
- Access to a robust spectrum of development resources to enhance your skills and/or advance your career including:
- Free learning resources through a modern and engaging platform
- Education Assistance Program
- Reimbursement for a professional membership
- Self-directed Mentoring

#### **About us**

Lockheed Martin Canada is the Canadian-based arm of Lockheed Martin Corporation, a global security and aerospace company employing 115,000 people worldwide, including more than 1,300 Canadians. By applying innovative approaches of our highly skilled and experienced Canadian workforce, we have been Canada's trusted defence and aerospace partner for over 80 years. We operate major facilities in Ottawa, Montreal, Halifax, Calgary and Victoria and work on a wide range of programs from advanced naval technology products and unmanned systems software to providing delivery and in-service support of the latest military aircraft to commercial engine repair and overhaul capabilities. This position is part of the Rotary and Mission Systems business area, where employees across Canada support engineering, systems integration, training, sustainment and in-service support programs for Canadian and international military customers across land, air and sea.

#### **Equal Opportunity Statement**

Lockheed Martin Canada is an equal opportunity employer that values diversity in the workplace. We are committed to excellence in serving all customers, including people with disabilities, and we encourage feedback on the provision of these services.

### **Job Requirements**

#### **What you bring to the role**

- Current student in Computer Science, Computer Engineering, Electrical Engineering, or substantially similar field
- Aptitude for programming and debugging with the latest tools in an Object Oriented environment
- Able to work 100% on-site
- Eligible for North Atlantic Treaty Organization (NATO) Secret clearance.

#### **Additional skills desired for the role**

- Knowledge of programming in Java and C++
- Knowledge of Agile/Scrum software development practices
- Good communication skills, and ability to work within a team

**Citizenship Requirement** N/A
