**Job Description**

**Job Title: Radio Systems Co-op**  
**Job ID: 777325**

At this time, Ericsson Canada Inc. does not provide immigration assistance/sponsorship now or in the future for this position.

#### About this opportunity:

As a Radio Systems Co-op, you will help design and systemize how Ericsson radio products behave by translating market and technical requirements into clear functional specifications. You will work with HW, Systems and Verification development teams to ensure the radio system works correctly across key performance areas.

You will support the creation and updating of essential product documentation.

You will collaborate closely with cross-functional teams in Systems, Software, Hardware, Test, and Project Management to contribute to high-quality deliverables such as Product Requirements, Link Budgets and AI Optimization of deliverables.

This role is ideal for early-career engineers who want to grow their knowledge of wireless systems, radio products, system design, and secure product development.

#### What you will do:

- Support systemization activities by helping break down market and program requirements into clear HW/SW design inputs.
- Learn how radio functions are architected and assist senior developers with requirement refinement.
- Documentation Ownership (Entry-Level)
- Assist in creating or updating specifications, interface descriptions, and parameter documentation
- Ensure documentation is accurate, consistent, and traceable under the guidance of senior team members.

- Support integration and verification teams by clarifying functional behavior, expected outcomes, and acceptance criteria.
- Engage in improving ways of working within the team.
- Learn from senior engineers and gradually contribute to standardization of systemization practices.

The salary range for this position is

- CAD 25.50-34.50 per hour

#### **Job Requirements**

##### **The skills you bring:**

- In Electrical Engineering, Computer Engineering, Computer Science, or a related technical field.
- Basic understanding of radio systems, wireless communication concepts, or digital signal processing (coursework or internship experience is acceptable).
- Familiarity with fundamental software/hardware architecture concepts.
- Interest in learning about Radio Access Networks (RAN).
- Exposure (through school, projects, or internships) to systems engineering concepts such as requirement analysis or functional documentation.
- Interest or familiarity with open interface standards.
- Awareness of cybersecurity.
- 2.7+ GPA on a 4.0 scale or equivalent
- Actively enrolled in an accredited undergraduate, on a full-time basis at a 4-year college or university at the time of the internship
- Be available to work 40 hours per week during the summer or Co-Op term

**Citizenship Requirement** N/A
