Job Description

Your application will be reviewed for consideration across multiple positions with responsibilities aligned to those described in this job posting.

Please upload your transcript and work term evaluation with your application.

What is the opportunity?

As an Actuarial Co-op Student, you will receive an excellent opportunity to gain hands-on experience with real-world business problems, be challenged to resolved complex tasks, and provided with valuable on-the-job trainings. This role will offer you an exciting opportunity to be part of the largest bank owned insurance company in Canada; you will apply, enhance, and develop experience and working knowledge to perform a combination of challenging tasks and operational assignments. RBC Insurance offers a very inclusive team that works cohesively together, which is integral to the success of continuing to grow all lines of business. We commit to formally structured access to leaders across our actuarial teams, and other business areas, to ensure you are learning all aspects of insurance and are prepared for a successful and rewarding career.

What will you do?

- Learn, influence, and innovate end to end aspects of the business ranging from sales to pricing and valuation to risk & capital. These roles will offer opportunities to gain exposures to all areas of business.
- Creating pricing and valuation models for complex and high-impact products from an actuarial perspective including but not limited to asset strategy discussions with RBC Insurance Investment team and liability cash flow management with RBC Risk Management.

- Assist in validation of key assumptions, gathering and applying market competition, and using business insights to identify trends/opportunities.
- Using software like AXIS, R, SQL and MS Excel to produce and analyze results, communicate findings to respective stakeholders to obtain their approvals.
- Develop, maintain, and enhance new and existing tools to better streamline processes.
- Collaborate with fellow actuarial and non-actuarial colleagues to achieve success.
- Conduct monthly/quarterly valuation reporting, and communicate results and findings to management.
- Model and analyze Special Quotes to better serve our clients' needs.
- Support monthly/quarterly capital measurement analysis and reporting.

Please note: This posting is for a 4, 8, 12 and 16 months Summer 2026 Student placement with a start date of May 2026.

Job Requirements

What do you need to succeed?

Must have

- Knowledge of MS Office Suite
- Solid technical and analytical skills with strong problem-solving ability
- Strong written and verbal communication skills
- Highly motivated self-starter and team player

Nice to have

- Pursuing a university degree in Actuarial Science, Finance, Statistics, or Mathematics
- Actuarial exposure/background
- 2-3 CAS/SOA exams completed
- Previous experience with Moody's/GGY AXIS
- Knowledge of IFRS17, predictive analytics and Tableau are definite assets
- Programing experience in R, VBA and SQL

Citizenship Requirement N/A
