<b>Salary</b>	20.0 per hour for 0 Major List

#### Job Description

##### About the Role:

We are seeking a motivated and detail-oriented Embedded Software Intern to join our testing team. In this role, you will work on evaluating and validating embedded software used in gas detector systems. This is an excellent opportunity for students or recent graduates to gain hands-on experience in software testing for critical safety systems in a collaborative and innovative environment.

##### Key Responsibilities:

###### Testing and Debugging:

- Conduct functional, performance, and regression testing of firmware and software.
- Perform hardware testing to validate system functionality under various conditions.
- Identify, document, and track bugs, issues, or inconsistencies using issue-tracking tools.
- Assist in setting up test environments and ensuring accurate test execution.

###### Documentation:

- Prepare detailed test reports, highlighting findings and recommendations for embedded software improvements.
- Maintain documentation of testing procedures and results to ensure traceability and compliance with quality standards.

###### Collaboration:

- Work closely with software and hardware engineers to troubleshoot and resolve issues.
- Participate in team meetings and provide insights on testing progress and challenges.

**Benefits:**

- Gain hands-on experience in testing safety-critical embedded systems.
- Work with a team of experienced engineers and mentors.
- Access to cutting-edge technologies and tools.
- Networking opportunities within the industry.

**Application Process:**

Please submit your resume, cover letter, references (ideal 3) and any relevant project portfolios. Applications will be reviewed on a rolling basis.

*Join us to contribute to creating reliable and innovative solutions for gas detection systems while advancing your career in embedded software testing!*

**Job Requirements****Qualifications:**

## Education:

- Currently pursuing or recently completed a Bachelor's or Master's degree in Computer Engineering, Electrical Engineering, Embedded Systems, Mechatronics, Computer Science, Engineering Physics or a related field.

## Technical Skills:

- Knowledge of embedded systems and microcontrollers.
- Familiarity with programming languages such as C/C++.
- Experience with testing tools (e.g., multimeter, calibrators, oscilloscopes, logic analyzers, or debuggers).
- Understanding of software development and testing lifecycle.

## Soft Skills:

- Strong analytical and problem-solving skills.
- Attention to detail and commitment to quality.
- Ability to work both independently and collaboratively in a team environment.

## Preferred Skills (Not Mandatory):

- Knowledge of gas detection technologies or sensor systems.
- Familiarity with Agile methodologies and version control systems (e.g., Bitbucket , Git).

**Citizenship Requirement** N/A

**APPLICATION INFORMATION**

**Application Procedure** Through Employer Website

**Cover Letter Required?** Yes

**Address Cover Letter to** Hiring Manager

**Special Application Instructions**

Please submit your resume, cover letter, references (ideal 3) and any relevant project portfolios. Applications will be reviewed on a rolling basis.

Application Link: <https://cetci.bamboohr.com/careers/67>

Please click the "I intend to apply to this position" button on SCOPE and also submit your application via the employer's website.

Applications are accepted on a rolling basis and the posting may be expired at any time by the employer as submissions are received.

Students should submit their applications as soon as they are ready.
