Job Title: Automated Operations Engineer(3)

Job ID: 780821

Location: Montréal | Toronto, Canada

At this time, Ericsson Canada Inc. does not provide immigration assistance/sponsorship now or in the future for this position.
We are looking for a Network Operations Intern/Co-Op to support our team in monitoring and maintaining telecom network services. In this role, you will gain hands-on experience in network monitoring, incident response, and service assurance while learning how large-scale telecom networks operate. You will work alongside experienced engineers and operations specialists to help ensure services remain available and meet Service Level Agreement (SLA) performance targets.

What you will do:

- Work to develop automation of maintenance tasks using programming language (Python, Linux Bash scripting, Groovy and Java) and DevOps pipelines.
- Participate to build Artificial Intelligence use cases to turn operations from reactive to predictive.
- Support the incident management process by tracking tickets, documenting updates, and assisting with troubleshooting under supervision.
- Learn how core network and radio access network (RAN) components are monitored and maintained; assist with routine checks and maintenance coordination.
- Help analyze logs, alarms, and performance metrics to identify potential service issues.
- Support controlled remote access activities and change management processes following established procedures.
- Maintain accurate records of incidents, maintenance activities, and operational updates; assist with status reporting.

- Work with engineering, security, and service teams to understand how issues are resolved and services restored.
- Contribute to process documentation, playbooks, automation scripts, or dashboard improvements to enhance operational efficiency.

Compensation and Benefits at Ericsson

At Ericsson, we know that our people are the key to our success. We offer a competitive package to help with your individual needs and goals.

Your Pay

The salary offered is dependent on various factors including, but not limited to, location, and the candidate's combination of job-related knowledge, qualifications, skills, education, training, and experience.

- Montreal:
- Bachelors: \$24.00 - \$32.50 Hourly CAD
- Masters: \$35.00 hourly CAD
- Toronto:
- Bachelors: \$25.50 - \$34.50 Hourly CAD
- Masters: \$37.00 hourly CAD

Job Requirements

The skills you bring: (Student Level)

- Currently pursuing a Bachelor's or Master's degree in: Information Technology, Telecommunications, Computer Science, Electrical/Computer Engineering, or a related field
- Minimum 2.7 GPA (on a 4.0 scale) or equivalent
- Actively enrolled full-time at an accredited 4-year college or university
- Available to work 40 hours per week during the summer or co-op term
- Networking fundamentals (routing basics)
- OSI model concepts
- Programming language: Python, Linux Bash scripting, Groovy and Java
- Understanding of REST APIs, JSON, and authentication (OAuth2, tokens).
- Basic familiarity with Linux command line and Git (branching).
- Strong analytical and problem-solving skills
- Clear written and verbal communication (English; French is a plus).

Preferred / Nice-to-Have:

- Exposure to telecom domains (RAN, Core, OSS/BSS, Cloud) through coursework or projects
- Experience with monitoring tools or ticketing systems (academic or lab exposure is fine)
- Understanding of virtualization or cloud fundamentals

Citizenship Requirement N/A
