54482

Introduction

Thomas J. Watson said it best: "Good design is good business." Visualization is critical to discovering data-driven insights and effectively communicating that knowledge to others. Designers at IBM work to create experiences that work together, work the same, and work for our clients. Does the thought of creating the platform at the heart of solutions like Watson, Blockchain, IoT, and Security excite you? If so, read on!

IBM Developer Skills Network is part of the Developer Ecosystem Group. We engage closely with all business units of IBM, academic institutions, and customers large and small. As part of our open source mission, we work closely with various open source communities as both contributors and users. We containerize and orchestrate at scale. We apply machine learning, AI, and everything else that's cool and new. We care about your passion and competence, not the number of years.

We make bets about what's coming next, not just what is popular today. We are looking for someone who is not afraid of learning new technologies fast and apply them to implement creative solutions to scaling and service reliability problems.

We have a great working environment with the latest tools and the smartest people. You'll have ultimate flexibility in choosing technologies. You will learn, learn, and learn. We guarantee continuous learning at the cutting edge of everything tech. You will establish your eminence in the industry. With an audience of several million across our platforms, your work will directly impact millions of learners worldwide.

Your role and responsibilities

This position resides in Markham, ON and is a 8 month work term commencing in January 2026 and/or September 2026. It is mandatory that all applicants are enrolled in full-time studies at a post-secondary institution and returning to full-time studies upon completion of the work-term.

As a UX Designer, you will be learning and applying skills for designing, & developing web & graphical user interfaces and creating their media, with the aim of increasing users and engagement across several platforms.

You will work with various graphic design and web development tools and technologies. You will create mockups, layouts, icons, tiles, etc. for websites, applications, and social media campaigns.

Job Requirements

Required education

High School Diploma/GED

Preferred education

Bachelor's Degree

Required technical and professional expertise

- * Graphics design experience;
- * Excellent communication and creative skills;
- * Prototyping with Figma.
- * Understanding of UI/UX design principles;
- * Passion for user experience and research;
- * Must be eligible to work 8 months starting in January and/or September.

Preferred technical and professional experience

- * HTML, CSS, and basic JavaScript;
- * Understanding of color theory and typography;
- * Knowledge of best practices for accessible design;
- * Registered in a formal co-op/internship program.

Must have the ability to work in Canada without sponsorship.

This role will involve working with technology that is covered by Export Regulations sanctions. If you are a Foreign National from any of the following US sanctioned countries (Cuba, Iran, North Korea, Syria, and the Crimea, Luhansk, Donetsk, Kherson, and Zaporizhia regions of Ukraine) on a work permit, you are not eligible for employment in this position.

Citizenship Requirement	N/A
