Job Title: Computer Engineering Intern, TFE Service Team

Job ID: 8023

Build an Aviation Career You're Proud Of

At StandardAero, we use our ingenuity and know-how to find solutions for the simple to the most complex challenges in aviation. Together, we get the job done and done well. Our stability, resources, and respectful culture supports you in building a solid career with a great team you can count on day in and day out for the long term.

As a summer intern you will support StandardAero's Test Facilities Engineering projects.

What you'll do:

- Support the development, testing, and debugging of software applications.
- Contribute to creating user interfaces (UI) and software tools for monitoring or testing systems.
- Help with data analysis, including mining, visualization, and interpretation to support projects.
- Document development processes, code changes, and testing results.
- Collaborate with team members on various software projects and assist in troubleshooting issues.
- Participate in special projects, provide general technical support, and follow all company guidelines and safety practices.
- Gain exposure to different aspects of software engineering, including development, testing, integration, and analysis.

Inclusivity Is Our Standard

StandardAero offers equal employment opportunities for all. Our supportive environment celebrates diversity with no room for harassment or discrimination of any kind. We invite you to be who you are and experience our welcoming culture.

Raising the Standard of Excellence since 1911

With over a century of proven excellence, StandardAero has become an industry leader in MRO services and customized solutions

in the aerospace field. Our shared values and learning-based culture inspire our team to exceed their potential and power our customers' missions worldwide. With on-the-job training, advancement opportunities, and excellent benefits, StandardAero invites you to experience a fulfilling and meaningful career with us.

#LI-AB1
