#### **Introduction**

A career in IBM Consulting is rooted by long-term relationships and close collaboration with clients across the globe. You'll work with visionaries across multiple industries to improve the hybrid cloud and AI journey for the most innovative and valuable companies in the world. Your ability to accelerate impact and make meaningful change for your clients is enabled by our strategic partner ecosystem and our robust technology platforms across the IBM portfolio; including Software and Red Hat. Curiosity and a constant quest for knowledge serve as the foundation to success in IBM Consulting. In your role, you'll be encouraged to challenge the norm, investigate ideas outside of your role, and come up with creative solutions resulting in ground breaking impact for a wide network of clients. Our culture of evolution and empathy centers on long-term career growth and development opportunities in an environment that embraces your unique skills and experience.

#### **Your role and responsibilities**

We are seeking a motivated AI & Mobile Application Developer Intern for a 12-month work term starting January 2026 in Toronto. This opportunity is open to applicants currently enrolled in full-time studies at a post-secondary institution and returning to full-time studies after the internship.

In this role, you'll apply your skills in native mobile development (iOS/Android/React Native) and AI integration to build innovative, user-facing solutions. You'll work alongside Product Managers, Architects and Engineers to create mobile applications that leverage modern AI tools and cloud services to solve business challenges.

You will have the opportunity to:

- Build and enhance mobile applications across platforms (iOS with Swift/SwiftUI, Android using Kotlin/Java and cross-platform with React Native).

- Apply AI capabilities (e.g., large language models, computer vision, generative AI, or automation APIs) to real-world use cases.
- Work with cloud-native technologies such as Kubernetes, Docker, and CI/CD pipelines for mobile + AI apps.
- Participate in client-facing or internal innovation projects, creating prototypes, demos, and production-ready features.

This internship is ideal for students excited about combining mobile app development with AI-driven features to deliver impactful solutions.

This position resides in Toronto and is a 12-month work term commencing in Jan 2026. It is mandatory that all applicants are enrolled in full-time studies at a post-secondary institution and returning to full-time studies upon completion of the work-term

## Job Requirements

### Required education

High School Diploma/GED

### Preferred education

Bachelor's Degree

### Required technical and professional expertise

We don't expect you to know everything but here are some experiences and interests that will help you succeed:

- Experience in native mobile development (iOS Swift/SwiftUI, Android Kotlin/Java/Jetpack Compose, or React Native).
- Curiosity about AI/ML concepts and how to apply them using modern frameworks or APIs.
- Familiarity with a programming language such as Typescript, Java, Swift or Kotlin.
- Willingness to learn independently and communicate ideas clearly in a team setting.

### Preferred technical and professional experience

These are not required but will help you get the most out of your internship:

- Course work, projects, hackathons or previous co-op terms involving mobile development or AI applications.
- Exposure to AI frameworks or APIs (e.g., TensorFlow, PyTorch, scikit-learn, OpenAI/Watson APIs).
- Familiarity with Python for scripting or experimenting with AI models and data workflows.
- Familiarity with cloud platforms (AWS, Azure, IBM Cloud, or GCP) and cloud-native tools (Kubernetes, Docker).
- Experience experimenting with AI features in mobile apps, such as chatbots, recommendation engines, or image recognition.
- Exposure to modern frontend frameworks such as ReactJS or Angular.
- Interest in prototyping and building demos that showcase new technology.

Above all, we're looking for curious builders who want to learn, experiment and make an impact.

## OTHER RELEVANT JOB DETAILS

Must have the ability to work in Canada without sponsorship.

This role will involve working with technology that is covered by Export Regulations sanctions. If you are a Foreign National from any of the following US sanctioned countries (Cuba, Iran, North Korea, Syria, and the Crimea, Luhansk, Donetsk, Kherson, and Zaporizhia regions of Ukraine) on a work permit, you are not eligible for employment in this position.

Citizenship Requirement	N/A
