Job Description	

Who we are:

Geotab ® is a global leader in IoT and connected transportation and certified "Great Place to Work™." We are a company of diverse and talented individuals who work together to help businesses grow and succeed, and increase the safety and sustainability of our communities.

Geotab is advancing security, connecting commercial vehicles to the internet and providing web-based analytics to help customers better manage their fleets. Geotab's open platform and Geotab Marketplace ®, offering hundreds of third-party solution options, allows both small and large businesses to automate operations by integrating vehicle data with their other data assets. Processing billions of data points a day, Geotab leverages data analytics and machine learning to improve productivity, optimize fleets through the reduction of fuel consumption, enhance driver safety and achieve strong compliance to regulatory changes.

Our team is growing and we're looking for people who follow their passion, think differently and want to make an impact. Ours is a fast paced, ever changing environment. Geotabbers accept that challenge and are willing to take on new tasks and activities - ones

that may not always be described in the initial job description. Join us for a fulfilling career with opportunities to innovate, great benefits, and our fun and inclusive work culture. Reach your full potential with Geotab. To see what it's like to be a Geotabber, check out our blog and follow us @InsideGeotab on Instagram. Join our talent network to learn more about job opportunities and company news.

Who you are:

We are always looking for amazing talent who can contribute to our growth and deliver results! Geotab is seeking a Product Design Intern who will help deliver the best possible experience for our customers . If you love technology, and are keen to join an industry leader - we would love to hear from you!

What you'll do:

As a Product Design Intern your key area of responsibility will be assisting with design, interaction and user experience efforts across Geotab's applications. This will involve conducting desk research, participating in user testing and validation, creation of wireframes, mockups and generally covering the entire spectrum of the design process. You will need to work closely with a Lead Designer, product managers and developers. This is a great learning opportunity to get real world experience for building products with massive scale and impact.

To be successful in this role you will need to be a strong collaborator, clear communicator both written and verbally, harbor great ambition and initiative, with an intense passion for the craft of design and deep empathy for human problems. Solving problems for real people excites you and you want to build products that make the world safer and better for all.

The opportunity:

- 12 month work-term beginning May 2026.
- Full-time, paid internship: Monday - Friday, 37.5hrs/week.
- Your first week at Geotab begins with 'GEO Launch' - a one-week Employee Orientation. [Click here](#) to learn more!
- Learn more about the Geotab Campus Program [here](#).
- This posting is for an existing vacancy.

How you'll make an impact:

- Assist with a full spectrum of Product Design activities including, but not limited to, research, ideation, creation and validation of Geotab products.
- Partner with cross-functional members during design and development to understand requirements and user needs, refine broad concepts into customer solutions.
- Illustrate ideas using storyboards, process flows, and other information diagrams.
- Design flows and experiences that simplify and distill down complex actions into usable interfaces
- Develop deep insights about user behavior.
- Collect feedback from end users and subject matter experts, synthesizing findings into consumable formats for other team members.
- Use Design Principles and Design Systems to produce visually cohesive, simple and consistent designs.
- Support Geotab global strategic initiatives.
- Maintain compliance with AODA guidelines for accessibility, regularly test designs for pleasantly usable experiences for a diverse set of customer needs and capabilities.
- Ensure designs work in different browsers and devices.

Job Requirements

What you'll bring to the role:

- Completing a Degree or Diploma in UX Product, Interaction Design, User experience, Product design, Industrial design, Graphic design, HCI, or similar.
- Proficient in product design software such as: Figma, Figjam, Lucidchart, usertesting.com

- Understanding and working knowledge of design principles and visual dynamics.
- Understanding and working knowledge of behavioral sciences, research methods and data analysis.
- Demonstrate an ability to apply design principles to real-world projects and problems.
- A portfolio showcasing previous product design projects, including school assignments, personal projects or freelance work.**

Citizenship Requirement N/A
