Job Title: Front-End Junior Software Developer (React, React Native, TypeScript)

Location: Remote

Hours: Full-Time (40 hours/week)

Flexible Schedule: Must be available for remote meetings with team members and supervisors throughout the day.

Job Summary

We are seeking a talented and passionate Front-End Software Developer to join our team. The ideal candidate is highly skilled in React, React Native and TypeScript and will contribute to building and enhancing mobile applications. This role requires a proactive problem-solver, capable of working independently with minimal guidance from senior engineers. Familiarity with Expo, AWS Cognito, GraphQL, and GitHub for collaborative code management is highly desirable.

Key Responsibilities

- Develop and Optimize Mobile & Web Applications: Design, build, and maintain high-quality mobile & web applications using React Native, React and TypeScript.
- Problem Solving and Debugging: Diagnose and resolve technical challenges swiftly and independently. The role demands a self-starter with an investigative mindset who can tackle complex issues without senior oversight.

- Collaborative Code Management: Use GitHub for version control, issue tracking, and collaborative code reviews. Maintain clear and organized commit histories, manage branches, and participate in pull requests to ensure a clean, efficient, and scalable codebase.
- Explore New Technologies: Continuously research and implement new tools, libraries, and frameworks to enhance the application's performance and user experience.
- Coordinate with Team Members: Meet regularly with remote team members and supervisors to discuss project progress, technical hurdles, and align on development priorities.

Job Requirements

Qualifications

- Technical Skills:
 - Required:
 - Proficiency in React Native, React and TypeScript.
 - Familiar and versed with AWS Amplify.
 - Knowledge of GitHub workflows for collaborative coding, version control, and code review.
 - Ability to produce well-structured, readable, and maintainable code.
- Preferred:
 - Experience with Expo for developing cross-platform applications.
 - Familiarity with AWS Cognito for user authentication and authorization.
 - Understanding of GraphQL for efficient data fetching.

Requirements

- Equipment: Reliable internet connection and a personal computer equipped to handle development tasks.
- Schedule: Flexibility to work 40 hours a week with availability for remote meetings throughout the day.

What We Offer

- Remote Work: Enjoy a flexible work-from-home environment.
- Professional Growth: Opportunity to work with cutting-edge technologies and expand your skillset.
- Flexible Schedule: Adaptable work hours to meet personal and professional commitments.

Citizenship Requirement Canadian Citizens Only
