About Us

SECURE Your Future!

At SECURE, we're not afraid of tough jobs - because they matter. Join us in transforming waste into value, protecting communities, and building a stronger future. We've got your back while you build your career.

At SECURE, we believe students learn best through hands-on, immersive experiences. **This role is designed as a 12-16-month internship (full-time)** to give you the chance to gain deeper skills and exposure to the business. The internship will **begin in May 2026** and may be extended to align with your academic program.

What We Need From You?

At SECURE, we roll up our sleeves and take on the tough stuff with grit, innovation, and teamwork. We're looking for students who are:

- Ready to embrace challenges and bring forward new ideas.
- Determined, resilient, and driven to see tasks through.
- Adaptable and resourceful, with a strong ability to collaborate.
- Motivated to perform at a high level and support the team.

This summer student role offers hands-on experience in software development and quality assurance, supporting the team through coding tasks, executing test scripts, and participating in QA activities. The position provides exposure to the entire development cycle, enabling the delivery of high-quality software in a professional environment.

The Team

The student will be part of the Development team, working out of the Brookfield Office in downtown Calgary. The team collaborates closely with Analytics & Operational groups to deliver critical business solutions in a fast-paced, supportive environment.

A Day in The Life

- **Quality Assurance Support:** Assist in identifying software issues through testing and debugging, ensuring high standards of functionality and usability in each project phase. Collaborate with QA team members to execute test cases, document findings, and contribute to the improvement of overall software quality.
- **DevOps Administration:** Support the setup, configuration, and maintenance of development and deployment environments. Assist in automation and monitoring tasks to enhance the efficiency and reliability of software deployment pipelines.
- **Code Review Participation:** Actively participate in code reviews, offering constructive feedback and adhering to best practices in code quality and readability. Gain valuable insights from senior developers to improve personal coding standards and contribute to continuous improvement.
- **Test Script Creation and Execution:** Develop, execute, and maintain test scripts for various software applications, working closely with developers to ensure features meet requirements. Document test results and communicate any issues found, contributing to a thorough and reliable testing process.
- **Full Stack Development:** Support the team with entry-level development tasks, including frontend and backend coding, and bug fixes, gaining hands-on experience across the full tech stack.

What's in it for you

At SECURE, we focus on opportunities for growth - for our employees, our customers, our partners, and the communities we operate in. We are an energetic team that takes pride in tackling tough challenges and making a meaningful contribution. We attract, retain, and motivate employees with competitive compensation and by recognizing performance.

We Got This.

Job Requirements

Program Eligibility:

- Be enrolled in a post-secondary institution and available for the duration of the program.
- Be legally entitled to work in Canada (Citizen, PR, or valid work permit).
- Complete a Medical and/or Alcohol & Drug test if the role is considered safety sensitive.

Skills, Experience & Qualifications

- **Education & Eligibility:** Currently enrolled in a post-secondary program in Computer Science, Software Engineering, or a related field. Must be legally eligible to work in Canada.
- **Technical Skills:** Foundational knowledge of JavaScript and TypeScript; exposure to Node.js and full-stack development is an asset. Familiarity with testing frameworks/tools (e.g., Jest, Playwright) and database management is beneficial.
- **Experience:** Coursework, personal projects, or prior co-op experience in software development or QA considered an asset. Understanding of software development best practices and debugging is beneficial.
- **Industry Knowledge:** Basic understanding of the Canadian Energy Industry is an asset.

Citizenship Requirement N/A

APPLICATION INFORMATION

Application Procedure Through Employer Website

Cover Letter Required? Yes

Special Application Instructions

How to apply:

Submit one (1) combined PDF that includes all required documents **in this order:**

- **Cover Letter** - Answer both prompts:

- *Why do you want to work for SECURE?*

- *How does this position fit with your career goals?*

- **Resume**

- **Recent Transcripts** (official or unofficial)

- **File format & naming**

- **Format:** PDF only (no Word, Google Docs, or separate files)

- **Your Opportunity at SECURE**

- **Submission**

- Apply through SECURE's Careers site for this posting.

- Applications that are not submitted as one combined PDF may be considered incomplete.

- **Application Deadline**

Please submit your application by **October 17th, 2025**. Only applicants submitted through SECURE's career site will be acknowledged. Late submissions will not be accepted.

We thank all candidates for their interest; however, only those selected will be contacted.
