<b>Job Description</b>	

**Job Title:** Intern, Fundamental Forecasting

**Job ID:** JR00105

**Application Deadline:** **January 25, 2026**

The Fundamental Forecasting and Alpha Research teams are jointly recruiting an intern to contribute to data engineering, data science, and machine learning initiatives within Active Equities. Specific projects will be shaped by the candidate's profile and interests and may span both teams, combining fundamental and quantitative investing techniques. The intern will be expected to contribute to feature construction, machine learning pipelines, forecasting, data engineering, portfolio construction, and/or data-intensive research projects.

The Fundamental Forecasting team's objective is to create a diversifying alpha stream by forecasting financial outcomes at scale and systematically monetizing these forecasts. The team develops large-scale, systematic forecasts of individual company fundamentals using alternative data and advanced predictive techniques, and designs portfolios that effectively translate these fundamental insights into investment decisions.

The Alpha Research team conducts empirical research to expand understanding of alpha drivers and market efficiencies, using data driven and ML/AI methods to forecast and exploit them. Their focus is on expanding AE's edge by identifying and developing systematically exploitable sources of alpha.

We are looking for an Intern within Active Equities in Toronto starting in May 2026 for a 8-month internship.

**Citizenship Requirement** N/A
