Country	Canada
Duration	12 months
Work Mode	To be confirmed
Salary Currency	CAD
Salary	Salary Not Available, 0 Major List
Job Description	

Category: Software Development/ Engineering

Main location: Canada, Quebec, Montréal

Position ID: J0825-1619

Employment Type: Student Internship

Position Description:

We are seeking a motivated Cloud Specialist intern to join our dynamic team. As a key member of our Cloud Operations team, you will be responsible for administering, automating, and optimizing cloud infrastructure and services across various platforms. Your expertise will ensure the availability, security, scalability, and performance of our cloud-native and hybrid environments.

The Cloud Specialist delivers secure, reliable, and scalable solutions across multiple clients. With a focus on automation, infrastructure as code, CI/CD pipeline integration, monitoring, and system reliability, you will work with client and internal teams to build and support efficient cloud ecosystems. This role requires hands-on experience in public cloud platforms (GCP, AWS, Azure), scripting, containerization, infrastructure orchestration, and DevOps best practices.

Perks of Being a CGI Co-op:

- Participate in monthly socials to meet co-ops across the country.
- Access professional development workshops hosted by domain experts on topics ranging from how to be a top consultant, how to apply the agile methodology, data & analytics and more!

To learn more about CGI and hear from our Co-ops and New Grads, visit www.cgi.com/startmycareer

Start Date: January 5th, 2026
Application Deadline: September 26th, 2025

Your future duties and responsibilities:

- Administer and manage cloud infrastructure components, including compute, networking, storage, identity, and access management across multi-cloud environments.
- Provide hands-on support and leadership for cloud-based DevOps practices across Microsoft Azure, Amazon Web Services, or Google Cloud platforms.
- Implement monitoring solutions and automate alerting, scaling, and recovery strategies to ensure continuous service delivery.
- Support and maintain CI/CD pipelines using tools such as Jenkins, GitLab, GitHub Actions, and Azure DevOps.
- Collaborate with development and operations teams to integrate security, compliance, and best practices into the deployment lifecycle.
- Develop and maintain Infrastructure as Code using Terraform, CloudFormation, or similar tools.
- Manage containerization and orchestration platforms, including Docker and Kubernetes, in production environments.
- Troubleshoot and resolve complex issues related to performance, availability, and configuration across cloud and on-premises systems.
- Maintain system documentation, create runbooks, and contribute to knowledge sharing within the team.
- Promote a DevOps culture by mentoring teams, enforcing standards, and ensuring reliable and repeatable deployments.

What you can expect from us:

Together, as owners, let's turn meaningful insights into action.

Life at CGI is rooted in ownership, teamwork, respect and belonging. Here, you'll reach your full potential because...

You are invited to be an owner from day 1 as we work together to bring our Dream to life. That's why we call ourselves CGI Partners rather than employees. We benefit from our collective success and actively shape our company's strategy and direction.

Your work creates value. You'll develop innovative solutions and build relationships with teammates and clients while accessing global capabilities to scale your ideas, embrace new opportunities, and benefit from expansive industry and technology expertise.

You'll shape your career by joining a company built to grow and last. You'll be supported by leaders who care about your health and well-being and provide you with opportunities to deepen your skills and broaden your horizons.

At CGI, we value the strength that diversity brings and are committed to fostering a workplace where everyone belongs. We collaborate with our clients to build more inclusive communities and empower all CGI partners to thrive. As an equal-opportunity employer, being able to perform your best during the recruitment process is important to us. If you require an accommodation, please inform your recruiter.

Come join our team—one of the largest IT and business consulting services firms in the world.

Job Requirements

Required qualifications to be successful in this role:

- Federal government Reliability clearance - have or can obtain
- Bilingualism (French/English) is a major asset
- Hands-on experience in cloud administration, DevOps, and infrastructure automation with Azure, AWS, and GCP.
- Proficient with Infrastructure as Code (IaC) using Terraform (preferred) or other tools.
- Strong scripting and automation skills using Bash, PowerShell, or Python.

- Experience managing CI/CD pipelines, configuration management, and deployment automation.
- Cloud certifications (e.g., Azure Administrator, AWS DevOps Engineer, GCP DevOps Engineer) are highly desirable.
- In-depth understanding of cloud networking, storage, IAM, and security concepts.
- Experience with container orchestration platforms such as Kubernetes and Docker.
- Solid troubleshooting skills and the ability to respond to incidents in high-pressure environments.
- Excellent communication and collaboration skills in multi-disciplinary teams.
- Pursuing a bachelor's degree in Computer Science, Information Technology, or a related field.

Bilingualism (French and English) is required for this position due to the nature of the role, which involves interactions with both national and international clients.

Skills:

- AWS DevOps Engineer
- PowerShell
- Python

Citizenship Requirement N/A
